## How to Reach Us

### Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are available in print or electronic format. Maps and other geographic reference materials are available for some types of data. In some cases, workshops and seminars have been developed to provide additional information on some subjects.

### How to Obtain More Information

Inquiries about products and services should be directed to your local Statistics Canada Reference Centre:

St. John's	(709) 772-4073	Winnipeg	(204) 983-4020
Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691

For users who reside outside the local dialing area of the Regional Reference Centres, a toll-free number is provided:

Newfoundland and Labrador, Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831

the hearing impaired** 1-800-363-7629

### How to Order Products

Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the nearest Statistics Canada Regional Reference Centre, or by mail order from Publication Sales, Statistics Canada, Ottawa K1A 0T6. Contact the nearest Statistics Canada Regional Reference Centre for more information on electronic products and services. See the order form at the end of this product for further details.

## Pour nous joindre

### Des données sous plusieurs formes...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations normalisées et spéciales sont disponibles sur support papier ou électronique. Des cartes et d'autres documents géographiques de référence sont disponibles pour certains genres de données. Dans certains cas, des ateliers et des séminaires procurent des renseignements complémentaires sur certains sujets.

### Comment obtenir d'autres renseignements

Toutes les demandes de renseignements au sujet des produits et services doivent être adressées au centre de consultation de Statistique Canada de votre région :

St. John's	(709) 772-4073	Winnipeg	(204) 983-4020
Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691

Un numéro d'appel sans frais est offert aux utilisateurs qui habitent à l'extérieur du secteur d'appel local des centres régionaux de consultation :

Terre-Neuve et Labrador, Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192

---

## Note of Appreciation

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

---

## Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

## Preface

This publication is part of the "Profiles" series, a collection of 72 reports designed to provide a statistical overview for five different types of census geographic areas. These consist of census divisions and census subdivisions (e.g., municipalities), census metropolitan areas and census agglomerations (large urban centres), census tracts (neighbourhoods) for census metropolitan areas and selected census agglomerations, federal electoral districts, and urban and rural areas.

Each profile is divided into two parts: Part A provides basic demographic, mother tongue, dwelling, household and family data collected from all households, that is, on a 100% basis. Part B provides data collected from a 20% sample of households on characteristics such as home language, ethnic origin, place of birth, education, religion, labour force activity, housing costs and income.

This particular publication presents the Part B profile for federal electoral districts as defined by the 1987 Representation Order.

I would like to express my appreciation to the millions of Canadians who completed their questionnaire on June 4, 1991, as well as to all those who assisted Statistics Canada in planning and conducting the census.

Ivan P. Fellegi  
Chief Statistician of Canada

## Préface

La présente publication fait partie de la série «Profils», une collection de 72 rapports conçus pour donner un aperçu statistique de cinq différents genres de régions géographiques du recensement. Il s'agit des divisions de recensement et subdivisions de recensement (p. ex., les municipalités), des régions métropolitaines de recensement et agglomérations de recensement (grands centres urbains), des secteurs de recensement (quartiers) pour les régions métropolitaines de recensement et certaines agglomérations de recensement, des circonscriptions électorales fédérales, et des régions urbaines et rurales.

Chaque profil est divisé en deux parties : la partie A fournit des données fondamentales sur les caractéristiques relatives à la démographie, à la langue maternelle, au logement, au ménage et à la famille recueillies auprès de l'ensemble des ménages. La partie B présente des données recueillies auprès d'un échantillon formé de 20 % des ménages sur des caractéristiques comme la langue parlée à la maison, l'origine ethnique, le lieu de naissance, l'éducation, la religion, l'activité, les coûts du logement et le revenu.

Cette publication présente la partie B du profil des circonscriptions électorales fédérales telles qu'elles sont définies par l'Ordonnance de représentation de 1987.

J'aimerais exprimer ma reconnaissance aux millions de Canadiens et Canadiennes qui ont rempli leur questionnaire le 4 juin 1991 et à tous ceux et celles qui nous ont prêté leur concours en travaillant à la planification et à la réalisation du recensement.

Le statisticien en chef du Canada  
Ivan P. Fellegi

## Introduction

This publication provides a profile for each of the 295 federal electoral districts as defined by the 1987 Representation Order. It is based on data collected by the 1991 Census of Canada from all households. These profiles show population counts for characteristics such as home language, knowledge of languages, religion, ethnic origin, place of birth, period of immigration, mobility status, fertility, highest level of schooling, labour force activity, occupation, and industry. They also show dwelling counts by need for repair, period of construction, as well as average housing costs for households, and income distributions for individuals, households and families.

## Organization of the Publication

The publication consists of a single table displaying the data for each federal electoral district (FED) in the columns. The data variables are identified down the sides of the table (the "stub"). The entire stub covers five full pages. The data have been grouped into blocks by universe (i.e. population, dwellings, households, and income). For each universe, data are shown in relation to a number of different characteristics. For example, population is shown first by home language, then by knowledge of official languages, next by knowledge of non-official languages, by religion, by ethnic origin, and so on.

The FEDs run across the top of the page. They are ordered alphabetically within each province or territory. The provinces and territories are organized from east to west. Columns containing the data for Canada, provinces and territories are also shown.

Users interested in locating data for a specific FED should refer to the Geographic Index on page 4. This shows the page on which the first block of data for each FED appears.

A reference map showing all FEDs is included in this publication.

## Introduction

La présente publication fournit un profil de chacune des 295 circonscriptions électorales fédérales telles qu'elles sont définies par l'Ordre de représentation de 1987. Elle est fondée sur les données recueillies auprès de l'ensemble des ménages dans le cadre du recensement du Canada de 1991. Ces profils présentent les chiffres de population pour des caractéristiques telles que la langue parlée à la maison, la connaissance des langues, la religion, l'origine ethnique, le lieu de naissance, la période d'immigration, la mobilité, la fécondité, le plus haut niveau de scolarité atteint, l'activité, la profession et l'industrie. Ils présentent également les chiffres des logements selon la nécessité de réparations ou non et la période de construction, de même que les coûts moyens d'habitation pour les ménages et la répartition du revenu pour les personnes, les ménages et les familles.

## Structure de la publication

La présente publication comprend un seul tableau où les données pour chaque circonscription électorale fédérale (CÉF) figurent dans les colonnes. Les variables ayant trait aux données sont énumérées de chaque côté du tableau (la «colonne de titres»). L'ensemble de la colonne de titres tient sur cinq pages. Les données ont été regroupées en bloc selon l'univers (c.-à-d. la population, les logements, les ménages et le revenu). Pour chaque univers, les données sont ventilées selon un certain nombre de caractéristiques différentes. La population, par exemple, est d'abord répartie selon la langue parlée à la maison, puis selon la connaissance des langues officielles, ensuite selon la connaissance des langues non officielles, selon la religion, selon l'origine ethnique et ainsi de suite.

Les CÉF figurant au haut de la page apparaissent en ordre alphabétique pour chaque province ou territoire. Les provinces et territoires sont présentés d'est en ouest. On trouve également des colonnes qui contiennent les données pour le Canada, les provinces et les territoires.

Les utilisateurs qui désirent consulter les données propres à une CÉF particulière sont priés de se reporter à l'Index géographique à la page 4, qui donne la page où figure le premier bloc de données pour chacune des CÉF.

Une carte de référence présentant toutes les CÉF est comprise dans la publication.

## Content Considerations

The 295 FEDs reported in this publication have boundaries based on the 1987 Representation Order. Data for 1986 based on the same boundaries are shown in the 1986 Profiles publication "Federal Electoral Districts - 1987 Representation Order: Part 2" (Catalogue No. 94-134). The names entered in this publication are those that were in force on January 1, 1991 (geographic reference date for the 1991 Census of Canada). The 1986 Profiles publication "Federal Electoral Districts - 1976 Representation Order: Part 2" (Catalogue No. 94-126) has different geographic areas for the 282 FEDs based on the 1976 Representation Order.

On some Indian reserves and Indian settlements in the 1991 Census, enumeration was not permitted or was interrupted before it was completed. Moreover, some Indian reserves and Indian settlements were enumerated late or the quality of the population and dwelling counts was not considered adequate. These geographic areas (a total of 78) are called incompletely enumerated Indian reserves and Indian settlements. Data are not available for these reserves and settlements. Federal electoral districts containing one or more incompletely enumerated Indian reserves or settlements are shown with an appended † in the Geographic Index, and in the table of selected characteristics. Appendix 2, which lists the incompletely enumerated Indian reserves and Indian settlements, also shows the FED in which each is located. This issue is discussed in more detail in the "Special Notes".

## Symbols

The following standard symbols may be found in Census products.

- .. Figures not available.
- ... Figures not appropriate or not applicable.
- Nil or zero.
- Amount too small to be expressed.
- XXX Figures suppressed to protect confidentiality.
- \*\* The median could not be calculated as it occurred in an open-ended class.
- \* Land area is included in neighbouring census subdivision.

## Considérations relatives au contenu

Les limites des 295 CÉF présentées dans la publication ont été déterminées d'après l'Ordre de représentation de 1987. Les données de 1986 présentées selon ces mêmes limites figurent dans la publication de 1986 de la série Profils intitulée «Circonscriptions électorales fédérales - Ordre de représentation de 1987 : Partie 2» (n° 94-134 au catalogue). Les noms utilisés dans la présente publication sont ceux qui étaient en vigueur au 1<sup>er</sup> janvier 1991 (date de référence géographique du recensement du Canada de 1991). La publication de 1986 de la série Profils intitulée «Circonscriptions électorales fédérales - Ordre de représentation de 1976 : Partie 2» (n° 94-126 au catalogue) présente des régions géographiques différentes pour les 282 CÉF délimitées selon l'Ordre de représentation de 1976.

Lors du recensement de 1991, le dénombrement n'a pas été autorisé sur certaines réserves indiennes et établissements indiens ou a été interrompu avant d'être mené à terme. De plus, certaines réserves indiennes et établissements indiens ont été dénombrés tardivement ou la qualité des chiffres de population et des logements a été jugée insuffisante. Ces régions géographiques (un total de 78) sont appelées réserves indiennes et établissements indiens partiellement dénombrés. Les données ne sont pas disponibles pour ces réserves et établissements. Les circonscriptions électorales fédérales qui contiennent au moins une réserve indienne ou un établissement indien partiellement dénombré sont signalées à l'aide des caractères † dans l'Index géographique et dans le tableau de certaines caractéristiques. L'annexe 2, qui dresse la liste des réserves indiennes et établissements indiens partiellement dénombrés, donne également la CÉF dans laquelle se trouve chacun de ceux-ci. Cette question est traitée plus en détail dans les «Notes spéciales».

## Signes conventionnels

Les signes conventionnels suivants peuvent être retrouvés dans les produits du recensement.

- .. Nombres non disponibles.
- ... N'ayant pas lieu de figurer.
- Néant ou zéro.
- Nombres infimes.
- XXX Nombres supprimés afin de protéger la confidentialité.
- \*\* Il est impossible de calculer la médiane car elle se trouve dans une des classes ouvertes de répartition utilisée pour calculer la médiane.
- \* La superficie est comprise dans la subdivision de recensement avoisinante.

- An error exists in the 1991 counts for this census subdivision (CSD). For further information, see the "Special Notes" section.

A Adjusted figure due to boundary change.

- † Excludes Census data for one or more incompletely enumerated Indian reserves or Indian settlements. For further information, see the "Special Notes" section.

¶ Incompletely enumerated Indian reserve or Indian settlement. For further information, see the "Special Notes" section.

- ◆ Data quality index showing a global non-response rate higher than or equal to 5% and lower than 25%. For further information, see the "Special Notes" section.

- ◆◆ Data quality index showing a global non-response rate higher than or equal to 25%. For further information, see the "Special Notes" section.

- ◇ Data quality index showing a global non-response rate for the housing questions which is higher than or equal to 25%. For further information, see the "Special Notes" section.

- Une erreur a été relevée dans les chiffres de 1991 pour cette subdivision de recensement (SDR). Pour plus de renseignements, voir la section «Notes spéciales».

A Chiffre ajusté à cause de changement de limite.

- † Ne comprend pas les données du recensement pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés. Pour plus de renseignements, voir la section «Notes spéciales».

¶ Réserve indienne ou établissement indien partiellement dénombré. Pour plus de renseignements, voir la section «Notes spéciales».

- ◆ Indice de qualité des données indiquant un taux global de non-réponse supérieur ou égal à 5 % mais inférieur à 25 %. Pour plus de renseignements, voir la section «Notes spéciales».

- ◆◆ Indice de qualité des données indiquant un taux global de non-réponse supérieur ou égal à 25 %. Pour plus de renseignements, voir la section «Notes spéciales».

- ◇ Indice de qualité des données indiquant un taux global de non-réponse aux questions sur le logement qui est supérieur ou égal à 25 %. Pour plus de renseignements, voir la section «Notes spéciales».

## Definitions

The definitions of geographic terms and census concepts are presented here in summary form only. Users should refer to the **1991 Census Dictionary** (Catalogue No. 92-301E) for the full definitions and additional remarks related to these concepts and definitions.

### Age

Refers to the age at last birthday (as of the census reference date, June 4, 1991). This variable is derived from the date of birth question which asks day, month and year of birth. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

### Age at Immigration

Refers to the age at which the respondent first obtained landed immigrant status. A landed immigrant is a person who is not a Canadian citizen by birth, but who has been granted the right to live in Canada permanently by Canadian immigration authorities.

### Bedrooms

Refers to all rooms designed and furnished as bedrooms and used mainly for sleeping purposes, even though the use may be occasional (i.e. spare bedroom).

### Census Family

Refers to a now-married couple (with or without never-married sons and/or daughters of either or both spouses), a couple living common-law (again with or without never-married sons and/or daughters of either or both partners), or a lone parent of any marital status, with at least one never-married son or daughter living in the same dwelling.

### Citizenship

Refers to the legal citizenship status of the respondent. Persons who are citizens of more than one country were instructed to indicate this fact.

### Class of Worker

This variable classifies persons who reported a job into those who (i) worked mainly for someone else for wages, salaries, commissions or payments "in kind", (ii) worked without pay in a family farm, business or professional practice owned or operated by a related household member, (iii) worked mainly for themselves, with or without paid help. The job reported was the one held in the week prior to enumeration if the person was employed, or the job of longest duration since January 1, 1990, if the person was not employed during the reference week. Persons with two or more jobs in the reference week were to provide information for the job at which they worked the most hours.

**Note:** Self-employed persons in incorporated companies in 1971 and 1981 Census publications are normally included in the paid worker category to permit comparisons with surveys of establishments and the System of National Accounts. In 1991 and 1986 Census publications, where space permits, self-employed persons whose farms or businesses were incorporated are shown separately.

### Condition of Dwelling

Refers to whether, in the judgement of the respondent, the dwelling requires any repairs (excluding desirable remodelling or additions).

**Regular maintenance** refers to painting, furnace cleaning, etc. **Minor repairs** refer to missing or loose floor tiles, bricks or shingles, defective steps, railing or siding, etc. **Major repairs** refer to defective plumbing or electrical wiring, structural repairs to walls, floors or ceilings, etc.

### Economic Family

Refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption.

### Employed

Refers to persons who, during the week prior to June 4, 1991:

- (a) did any work at all excluding housework or other maintenance or repairs around the home and volunteer work; or
- (b) were absent from their job or business because of own temporary illness or disability, vacation, labour dispute at their place of work, or were absent for other reasons.

Data are available for persons 15 years of age and over, excluding institutional residents.

### Ethnic origin

Refers to the ethnic or cultural group(s) to which the respondent's ancestors belong. Ethnic or cultural origin refers to the ethnic "roots" or ancestral background of the population, and should not be confused with citizenship or nationality.

It should be noted that, prior to the 1981 Census, only the respondent's paternal ancestry was to be reported. If multiple ethnic origins were reported, only one origin was captured, resulting in one ethnic origin per respondent. In 1981, this restriction was removed, allowing for multiple ethnic origins. One write-in was provided on the 1981 questionnaire, in addition to the mark-in boxes. The 1986 Census questionnaire allowed respondents to write in three ethnic origins not included in the mark-in boxes. In 1991, respondents could write in up to two ethnic origins not included in the mark-in circles.

The 1991 question was changed slightly from that asked in the 1986 Census. In 1991, respondents were asked "To which ethnic or cultural group(s) did this person's ancestors belong?" The

1986 Census question asked "To which ethnic or cultural group(s) do you or did your ancestors belong?"

In 1991, the ordering of the mark-ins was altered to more accurately reflect the changing relative size of ethnic groups based on single responses in the 1986 Census.

### **Experienced Labour Force**

Refers to persons who, during the week prior to June 4, 1991, were employed or unemployed but who had worked since January 1, 1990. The experienced labour force can be derived by deleting from the total labour force those unemployed persons 15 years of age and over who have never worked or who worked only prior to January 1, 1990.

### **Federal Electoral District (FED)**

A federal electoral district refers to any place or territorial area entitled to return a member to serve in the House of Commons (source: Canada Elections Act, 1990). There are 295 FEDs in Canada according to the 1987 Representation Order.

Federal electoral districts are defined according to the following criteria:

- (1) the legal limits and descriptions are the responsibility of the Chief Electoral Officer and are published in the Canada Gazette;
- (2) FED limits are usually revised every 10 years after the results of the decennial census.

### **Fertility**

Refers to the number of children ever born alive to women aged 15 years and over.

### **Full-time or Part-time Weeks Worked in 1990**

Refers to persons who worked in 1990. These persons were asked to report whether the weeks they worked in 1990 were full weeks (30 hours or more per week) of work or not. Persons with a part-time job for part of the year and a full-time job for another part of the year were to report the information for the job at which they worked the most weeks. Data are available for persons 15 years of age and over who worked in 1990, excluding institutional residents.

### **Gross Rent**

Refers to the total average monthly payments paid by tenant households to secure shelter.

### **Highest Level of Schooling**

Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

### **Home Language**

Refers to the language spoken most often at home by the individual at the time of the census.

### **Immigrant Population**

Refers to persons who are, or have been, landed immigrants in Canada. A landed immigrant is a person who is not a Canadian citizen by birth, but who has been granted the right to live in Canada permanently by Canadian immigration authorities. For further information on the immigrant population, see Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

### **Income: Average, Median and Standard Error**

#### **Average Income**

Average income refers to the weighted mean total income of a group of income units (individuals, families or households) and is calculated from unrounded data by dividing the aggregate income of the group (e.g., males, 45-54 years of age, female lone-parent families, one-person households) by the number of units in that group.

In the case of individuals, average income is calculated only for individuals with income (positive or negative). In all other cases, both with and without income units are included in the calculation.

This concept and procedure applies to total income, employment income, wages and salaries and any other component of income.

#### **Median Income**

The median income of a specified group of income units is that amount which divides their income size distribution into two halves, i.e. the incomes of the first half of the income units are below the median, while those of the second half are above the median.

In the case of individuals, median income is calculated only for individuals with income (positive or negative). In all other cases, both with and without income units are included in the calculation.

This concept and procedure applies to total income, employment income, wages and salaries and any other component of income.

#### **Standard Error of Average Income**

Refers to the estimated standard error of average income. It is an estimate of the error introduced into these data due to the fact that they are collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that the true value of the average income (i.e. the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error and virtually certain that it lies within plus or minus three times the standard error. These estimates of standard error do not include the effects of certain types of response error or systematic or coverage errors.

### **Income: Census Family Total Income**

The total income of a census family is the sum of the total incomes of all members of that family. Similarly, the income of a family from a particular source or sources is the sum of incomes of all family members from that source or sources.

### **Income: Composition of Income**

The composition of the total income of a population group or a geographic area refers to the relative share of each income source or group of sources, expressed as a percentage of the aggregate income of that group or area.

For the profile series three groups of sources are used; employment income, which includes wages and salaries and income from farm and non-farm self employment; government transfer payments which includes all transfers or payments received from any level of government and covered as a separate income source; other income which includes investment income, retirement pensions and other money income. See "Sources of Income" for each income source description.

### **Income: Employment Income**

Refers to total income received by persons 15 years of age and over during 1990 as wages and salaries, net income from unincorporated non-farm business and/or professional practice and net farm self-employment income.

### **Income: Household Total Income**

The total income of a household is the sum of the total incomes of all members of that household.

### **Income: Incidence of Low Income**

The incidence of low income is the proportion or percentage of economic families or unattached individuals in a given classification below the low income cut-offs. These incidence rates are calculated from unrounded estimates of economic families and unattached individuals 15 years of age and over. Since all members of an economic family share a common status, incidence of low income is also calculated for the population in private households.

### **Income: Income Status**

Refers to the position of an economic family or an unattached individual 15 years of age and over in relation to Statistics Canada's low income cut-offs (LICOs).

### **Income: Low Income Cut-offs (LICOs)**

Measures of low income known as low income cut-offs (LICOs) were first introduced in Canada in 1968 based on 1961 Census income data and 1959 family expenditure patterns. At that time, expenditure patterns indicated that Canadian families spent about 50% of their income on food, shelter and clothing. It was arbitrarily estimated that families spending 70% or more of their income on these basic necessities would be in "straitened" circumstances. With this assumption, low income cut-off points were set for five different sizes of families.

Subsequent to these initial cut-offs, revised low income cut-offs were established based on national family expenditure data from 1969, 1978 and 1986. These data indicated that Canadian families spent, on average, 42% in 1969, 38.5% in 1978 and 36.2% in 1986 of their income on basic necessities. By adding the original difference of 20 percentage points to the basic level of expenditure on necessities, new low income cut-offs were set at income levels differentiated by family size and degree of urbanization. Since then, these cut-offs have been updated yearly by changes in the consumer price index.

For the purposes of low income statistics, economic families and unattached individuals in the Yukon and the Northwest Territories and on the Indian reserves are excluded. The low income cut-offs were based on certain expenditure-income patterns which were not available from survey data for the entire population.

The census and the Survey of Consumer Finances differ slightly when applying the "Size of Area" classification to derive incidence of low income. Census takes into account the density of population to designate an enumeration area as urban and the total population of contiguous urban EAs determines the size of area. The survey takes complete CMAs or CAs and classifies these into size of area by total population within the CMA/CA boundaries. The overall impact of this difference is negligible.

Based on the 1986 revised cut-offs and adjusted for the changes in the Consumer Price Index, the following is the 1990 matrix of low income cut-offs:

**Low Income Cut-offs for Economic Families and  
Unattached Individuals, 1990**

Family size	Size of area of residence				
	500,000 or more	100,000 to 499,999	30,000 to 99,999	Small urban areas	Rural areas (farm and non-farm)
1	14,155	12,433	12,146	11,072	9,637
2	19,187	16,854	16,464	15,008	13,064
3	24,389	21,421	20,926	19,076	16,605
4	28,081	24,662	24,094	21,964	19,117
5	30,680	26,946	26,324	23,997	20,887
6	33,303	29,248	28,573	26,047	22,672
7 or more	35,818	31,460	30,734	28,017	24,385

**Income: Sources of Income**

All persons 15 years of age or over were asked to report their total money income from the following sources during the calendar year 1990:

(a) Wages and Salaries

Refers to gross wages and salaries before deductions for such items as income tax, pensions, unemployment insurance, etc. Included in this source are military pay and allowances, tips, commissions and cash bonuses, as well as all types of casual earnings in the 1990 calendar year. The value of taxable allowances and benefits provided by employers, such as free lodging and free automobile use, is excluded.

(b) Net Income from Unincorporated Non-farm Business and/or Professional Practice

Refers to net income (gross receipts minus expenses of operation such as wages, rents and depreciation) received during calendar year 1990 from the respondent's non-farm unincorporated business or professional practice. In the case of a partnership, only the respondent's share was to be reported. Also included is net income from persons baby-sitting in their own homes, operators of direct distributorships such as those selling and delivering cosmetics, as well as from free-lance activities of artists, writers, music teachers, hairdressers, dressmakers, etc.

(c) Net Farm Self-employment Income

Refers to net income (gross receipts from farm sales minus depreciation and cost of operation) received during calendar year 1990 from the operation of a farm, either on own account or in partnership. In the case of partnerships, only the respondent's share of income was to be reported. Also included are advance, supplementary or assistance payments to farmers by federal or provincial governments. However, the value of income "in kind", such as agricultural products produced and consumed on the farm, is excluded.

(d) Old Age Security Pension and Guaranteed Income Supplement

Refers to Old Age Security pensions and Guaranteed Income Supplements paid to persons 65 years of age and over, and Spouses' Allowances paid to 60- to 64-year-old

spouses of Old Age Security recipients by the federal government only during the calendar year 1990. Also included are Extended Spouses' Allowances paid to 60- to 64-year-old widows/widowers.

(e) Benefits from Canada or Quebec Pension Plan

Refers to benefits received in calendar year 1990 under the Canada or Quebec Pension Plan, e.g., retirement pensions, survivors' benefits and disability pensions. Does not include lump-sum death benefits.

(f) Family Allowances

Refers to total allowances paid in calendar year 1990 by the federal and provincial governments in respect of dependent children under 18 years of age. For Quebec residents, "Allowance for children less than 6 years of age" and "Allowance for newborn children" are included. These allowances, though not collected directly from respondents, were calculated and included in the income of one of the parents.

(g) Federal Child Tax Credits

Refers to federal Child Tax Credits paid in calendar year 1990 by the federal government in respect of dependent children under 18 years of age. These credits, though not collected directly from respondents, were calculated and included in the income of one of the parents.

(h) Benefits from Unemployment Insurance

Refers to total Unemployment Insurance benefits received in calendar year 1990, before income tax deductions. It includes benefits for sickness, maternity, fishing, work sharing, retraining and retirement received under the Federal Unemployment Insurance Program.

(i) Other Income from Government Sources

Refers to all transfer payments, excluding those covered as a separate income source (Family Allowances, federal Child Tax Credits, Old Age Security pensions and Guaranteed Income Supplements, Canada or Quebec Pension Plan benefits and Unemployment Insurance benefits) received from federal, provincial or municipal programs in calendar year 1990. This source includes social assistance payments received by persons in need, such as mothers with dependent children, persons temporarily or permanently

unable to work, elderly individuals, the blind and the disabled. Included are provincial income supplement payments to seniors to supplement the Old Age Security pension and Guaranteed Income Supplement and provincial payments to seniors to help offset accommodation costs. Also included are other transfer payments such as benefits under the Canadian Jobs Strategy, veterans' pensions, war veterans' allowance, pensions to widows and dependants of veterans and workers' compensation. Additionally, any amounts received in 1990 for refundable Provincial Tax Credits, Federal Sales Tax Credits and the federal Goods and Services Tax Credits are included.

(j) Dividends and Interest on Bonds, Deposits and Savings Certificates and Other Investment Income

Refers to interest received in calendar year 1990 from deposits in banks, trust companies, co-operatives, credit unions, caisses populaires, etc., as well as interest on savings certificates, bonds and debentures and all dividends from both Canadian and foreign stocks. Also included is other investment income from either Canadian or foreign sources such as net rents from real estate, mortgage and loan interest received, regular income from an estate or trust fund, and interest from insurance policies.

(k) Retirement Pensions, Superannuation and Annuities

Refers to all regular income received during calendar year 1990 as the result of having been a member of a pension plan of one or more employers. It includes payments received from all annuities, including payments from a matured Registered Retirement Savings Plan (RRSP) in the form of a life annuity, a fixed term annuity, a registered retirement income fund or an income-averaging annuity contract; pensions paid to widows or other relatives of deceased pensioners; pensions of retired civil servants, Armed Forces personnel and Royal Canadian Mounted Police (RCMP) officers; annuity payments received from the Canadian Government Annuities Fund, an insurance company, etc. Does not include lump-sum death benefits, lump-sum benefits or withdrawals from a pension plan or RRSP or refunds of overcontributions.

(l) Other Money Income

Refers to regular cash income received during calendar year 1990 and not reported in any of the other nine sources listed on the questionnaire, e.g., alimony, child support, periodic support from other persons not in the household, net income from roomers and boarders, income from abroad (except dividends and interest), non-refundable scholarships and bursaries, severance pay, royalties and strike pay.

**Receipts Not Counted as Income**

Gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds, loans received, loans repaid to an individual as the lender, lump-sum settlements of insurance policies, rebates of property taxes and other taxes, and refunds of pension contributions were excluded as was all income "in kind" such as free meals, living

accommodations, or agricultural products produced and consumed on the farm.

**Total Income**

"Total income" refers to the sum of amounts received during 1990 by an income recipient from the sources of income listed above.

**Income: Total Income**

Refers to the total money income received from the following sources during the calendar year 1990 by persons 15 years of age and over:

Total wages and salaries

Net income from unincorporated non-farm business and/or professional practice

Net farm self-employment income

Family Allowances

Federal Child Tax Credits

Old Age Security pension and Guaranteed Income Supplement

Benefits from Canada or Quebec Pension Plan

Benefits from Unemployment Insurance

Other income from government sources

Dividends and interest on bonds, deposits, savings certificates and other investment income

Retirement pensions, superannuation and annuities

Other money income

**Industry (Based on 1980 Standard Industrial Classification)**

Refers to the general nature of the business carried out in the establishment where the person worked, as indicated by the name of the employer and the kind of business, industry or service. Data are available for persons 15 years of age and over, excluding institutional residents. If the person was not employed in the week prior to enumeration, the information relates to the job of longest duration since January 1, 1990. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Census industry data based on the 1980 Standard Industrial Classification (SIC) have three levels of aggregation. There are 18 divisions (labelled A to R) which are subdivided into 75 major groups, which are, in turn, subdivided into 296 unit groups.

Direct comparisons can be made between 1991 and 1986 Census industry data based on the 1980 SIC.

Direct comparisons of 1991 and 1986 data with industry data from the 1981 and 1971 Censuses are possible, based on the 1970 SIC. For further information, refer to the definition of Labour: Industry (Based on 1970 Standard Industrial

Classification) in the 1991 Census Dictionary (Catalogue No. 92-301E).

### **Inexperienced Labour Force**

The inexperienced labour force consists of unemployed persons 15 years of age and over who have never worked or who worked only prior to January 1, 1990.

### **Institutional Resident**

Refers to a resident of an "institutional" collective dwelling, other than staff members and their families.

"Institutional" collective dwellings are children's group homes and orphanages, nursing homes, chronic care hospitals, residences for senior citizens, hospitals, psychiatric institutions, treatment centres and institutions for the physically handicapped, correctional and penal institutions, young offenders' facilities and jails.

### **Knowledge of Non-official Languages**

Refers to the language or languages, other than English or French, in which the respondent can conduct a conversation.

The non-official language data are based on the respondent assessment of his or her ability to speak non-official languages.

### **Knowledge of Official Languages**

Refers to the ability to conduct a conversation in English only, in French only, in both English and French or in none of the official languages of Canada.

The official language data are based on respondent assessment of his or her ability to speak the two official languages.

### **Labour Force Activity**

Refers to the labour market activity of the working age population who, in the week prior to June 4, 1991, were **employed** or **unemployed**. The remainder of the working age population is classified as **not in labour force**. Data are available for persons 15 years of age and over, excluding institutional residents.

### **Landed Immigrant Status**

Refers to persons who are not Canadian citizens by birth, but who have been granted the right to live in Canada permanently by Canadian immigration authorities.

The landed immigrant status question, in conjunction with the citizenship question, permits Census data users to identify the non-immigrant population, the immigrant population and non-permanent residents. For more information on these populations, refer to Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

### **Marital Status (Legal)**

Refers to the conjugal status of a person.

### **Legally married (and not separated)**

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained.

### **Legally married and separated**

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

### **Divorced**

Persons who have obtained a legal divorce and who have not remarried.

### **Widowed**

Persons who have lost their spouse through death and who have not remarried.

### **Never married (single)**

Persons who have never married (including all persons less than 15 years of age) and persons whose marriage has been annulled and who have not remarried.

### **Mobility Status – Place of Residence 1 Year Ago**

Refers to the relationship between a person's usual place of residence on Census Day and his or her usual place of residence one year earlier. A person is classified as a **non-mover** if no difference exists; otherwise, a person is classed as a **mover** and this categorization is called Mobility Status (1 Year Ago). Within the category **movers**, a further distinction is made between **intraprovincial movers**, **interprovincial migrants** and **external migrants**.

**Non-movers** are persons who, on Census Day, were living at the same address which they occupied one year earlier.

**Movers** are persons who, on Census Day, were living at a different address than the one at which they resided one year earlier.

**Intraprovincial movers** are movers who, on Census Day, were living at a different address but in the same province/territory that they occupied one year earlier.

**Interprovincial migrants** are movers who, on Census Day, were living in a different province/territory one year earlier.

**External migrants** are movers who, on Census Day, were living outside Canada one year earlier.

### **Mobility Status – Place of Residence 5 Years Ago**

Refers to the relationship between a person's usual place of residence on Census Day and his or her usual place of residence five years earlier. A person is classified as a **non-mover** if no difference exists; otherwise, a person is classed as a **mover** and this categorization is called Mobility Status (5 Years Ago). Within the category **movers**, a further distinction is made between **non-migrants** and **migrants**; this difference is called migration status.

**Non-movers** are persons who, on Census Day, were living at the same address which they occupied five years earlier.

**Movers** are persons who, on Census Day, were living at a different address than the one at which they resided five years earlier.

**Non-migrants** are movers who, on Census Day, were living at a different address but in the same census subdivision (CSD) that they occupied five years earlier.

**Migrants** are movers who, on Census Day, were residing in a different CSD five years earlier (**internal migrants**) or who were living outside Canada five years earlier (**external migrants**). **Internal migrants** are further divided into two categories: **Intraprovincial migrants**, who moved to a different CSD within the same province, and **Interprovincial migrants**, who moved to another province.

**External migrants** are movers who, on Census Day, were living outside Canada five years earlier.

### Non-immigrant Population

Refers to persons who are Canadian citizens by birth. For further information on the non-immigrant population, see Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

### Non-permanent Residents

Refers to persons who hold a student authorization, employment authorization, Minister's permit or who are refugee claimants. For further information on this population, refer to the "Special Notes" section and to Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

### Not in the Labour Force

Refers to those persons who, in the week prior to enumeration, were unwilling or unable to offer or supply their labour services under conditions existing in the labour market. It includes persons who looked for work during the last four weeks but who were not available to start work in the reference week, as well as persons who did not work, did not have a new job to start in four weeks or less, were not on temporary lay-off or did not look for work in the four weeks prior to enumeration. Data are available for persons 15 years of age and over, excluding institutional residents.

### Occupation (Based on 1980 Standard Occupational Classification)

Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1990. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Occupation data are based on the 1980 classification structure which is composed of three levels of aggregation. There are 22

major groups which are subdivided into 80 minor groups. These, in turn, contain a total of 514 unit groups.

The 1981 and 1986 Censuses also used the 1980 Standard Occupational Classification to classify occupation data; therefore, direct comparisons with 1991 data are possible. For comparisons with 1971 data, adjustments must be made to the labour force universe and **only** occupation data classified to the 1971 Occupational Classification Manual can be used. For further information, refer to the definition of Labour: Occupation (Based on 1971 Occupational Classification Manual) in the 1991 Census Dictionary (Catalogue No. 92-301E).

### Occupied Private Dwelling

Refers to a private dwelling in which a person or group of persons are permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. These data, however, exclude private dwellings occupied solely by foreign and/or temporary residents.

### Owner's Major Payments

Refers to the total average monthly payments made by owner households to secure shelter.

### Owner's Major Payments or Gross Rent as a Percentage of Household Income

Refers to the proportion of average monthly 1990 total household income which is spent on owner's major payments (in the case of owner-occupied dwellings) or on gross rent (in the case of tenant-occupied dwellings). This concept is illustrated below:

(a) Owner-occupied non-farm dwellings:

$$\frac{\text{Owner's major payments}}{(\text{1990 total annual household income}) / 12} \times 100 = \text{ } \%$$

(b) Tenant-occupied non-farm dwellings:

$$\frac{\text{Gross rent}}{(\text{1990 total annual household income}) / 12} \times 100 = \text{ } \%$$

### Participation Rate

Refers to the total labour force (in reference week) expressed as a percentage of the population 15 years of age and over, excluding institutional residents. The participation rate for a particular group (age, sex, marital status, geographic area, etc.) is the labour force in that group expressed as a percentage of the population for that group.

### Period of Construction

Refers to the period in time during which the building or dwelling was originally constructed.

### Period of Immigration

Refers to groupings of years derived from the year of immigration question.

### Place of Birth

Refers to specific provinces or territories if born in Canada, or to specific countries if born outside Canada.

### Place of Work

Refers to the usual place of work of non-institutional residents 15 years of age and over who have worked since January 1, 1990. The variables usually relate to the individual's job in the week prior to enumeration. However, if the person had not worked in that week but had worked since January 1, 1990, the information related to the job held longest during that period.

### Presence of Children

The Presence of Children variable classifies females 15 years and over in private households into those with children at home and those with no children at home. Females with children at home are then further classified on the basis of the age groups of their children.

The term "children" refers to all blood, step-, or adopted sons and daughters, who have never married, regardless of age, in census families (in private households), who are living in the same dwelling as their parent(s). Sons and daughters who are currently or were previously married, or who are living common-law, are not considered to be members of their parent(s)' census family, even if they are living in the same dwelling.

### Private Dwelling

Refers to a separate set of living quarters with a private entrance either from outside or from a common hall, lobby, vestibule or stairway inside the building. The entrance to the dwelling must be one which can be used without passing through the living quarters of someone else. The dwelling must meet the three conditions necessary for year-round use:

- (1) a source of heat or power (as evidenced by chimneys, power lines, oil or gas pipes or meters, generators, woodpiles, electric lights, solar heating panels, etc.);
- (2) access to a source of drinking water throughout the year (as evidenced by faucets, drain pipes, wells, water pumps, etc.);
- (3) an enclosed space that provides shelter from the elements (as evidenced by complete and enclosed walls, by a roof,

and by doors and windows that provide protection from wind, rain and snow).

### Private Household

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

### Religion

Refers to specific religious denominations, groups or bodies as well as sects, cults, or other religiously defined communities or systems of belief.

### Rooms

Refers to the number of rooms in a dwelling. A room is an enclosed area within a dwelling which is finished and suitable for year-round living.

### School Attendance

Refers to either full-time or part-time (day or evening) attendance at school, college or university during the nine-month period between September 1990 and June 4, 1991. Attendance is counted only for courses which could be used as credits towards a certificate, diploma or degree.

### Sex

Refers to the gender of the respondent.

### Tenure

Refers to whether some member of the household owns or rents the dwelling, or whether the dwelling is band housing (on an Indian reserve or settlement).

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

A dwelling is classified as "rented" even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative. For census purposes, in a co-operative all members jointly own the co-operative and occupy their dwelling units under a lease agreement.

For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category, **band housing**, has been created for 1991 Census products.

### Total Labour Force

Refers to persons who were either employed or unemployed during the week prior to enumeration (June 4, 1991). Data are available for persons 15 years of age and over, excluding institutional residents.

## Unemployed

Refers to persons who, during the week prior to enumeration (June 4, 1991):

- (a) were without work, actively looked for work in the past four weeks and were available for work; or
- (b) were on lay-off and expected to return to their job and were available for work; or
- (c) had definite arrangements to start a new job in four weeks or less and were available for work.

Data are available for persons 15 years of age and over, excluding institutional residents.

## Unemployment Rate

Refers to the unemployed labour force expressed as a percentage of the total labour force (in reference week). The unemployment rate for a particular group (age, sex, marital status, geographic area, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group. Data are available for persons 15 years of age and over, excluding institutional residents.

## Value of Dwelling

Refers to the dollar amount expected by the owner if the dwelling were to be sold.

## Work Activity in 1990

Refers to the number of weeks in which a person worked in 1990 and whether these weeks worked were full-time or part-time. Individuals who worked 49 to 52 weeks, mostly full time, are classified as full-year, full-time workers.

## Data Quality

### General

The 1991 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. Users of census data should be aware such error exists, and have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process from the preparation of materials, through the listing of dwellings and data collection to processing. Some errors occur more or less at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature, the larger the group, the more accurate the corresponding estimate. It is for this reason that users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how

large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- **coverage errors**, which occur when dwellings and/or individuals are missed, incorrectly included or double counted;
- **non-response errors**, which result when responses cannot be obtained from a small number of households and/or individuals, because of extended absence or some other reason;
- **response errors**, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response;
- **processing errors**, which can occur at various steps including: **coding**, when "write-in" responses are transformed into numerical codes; **data capture**, when responses are transferred from the census questionnaire to computer tapes by key-entry operators; and **imputation** when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);
- **sampling errors**, which apply only to the supplementary questions on the "long form" asked of a one-fifth sample of households, and which arise from the fact that the results for these questions, when weighted up to represent the whole population, inevitably differ somewhat from the results which would have been obtained if these questions had been asked of all households.

The above types of error each have both random and systematic components. Usually, however, the systematic component of sampling error is very small in relation to its random component. For the other non-sampling errors, both random and systematic components may be significant.

### Coverage Errors

Coverage errors affect the accuracy of the census counts, that is the sizes of the various census universes: population, families, households and dwellings. While steps have been taken to correct certain identifiable errors, the final counts are still subject to some degree of error resulting from persons or dwellings being missed, incorrectly included in the census or double counted.

Missed dwellings or persons result in **undercoverage**. Dwellings can be missed because of misunderstanding of enumeration area (EA) boundaries, or because dwellings are hidden or appear uninhabitable. Persons can be missed when their dwelling is missed or classified as vacant, or when individual household members are omitted from the questionnaire because the respondent misinterprets the instructions on whom to include. Some individuals may be

missed because they have no usual residence and did not spend census night in any dwelling.

Dwellings or persons that are incorrectly included or double counted result in **overcoverage**. Overcoverage of dwellings can occur when structures unfit for habitation are listed as dwellings, or when units which do not meet the census definition of a dwelling are listed separately instead of being treated as part of a larger dwelling. Double counting of dwellings can occur, for example, because of ambiguity over EA boundaries. Persons can be double counted because their dwelling is double counted or because the guidelines on whom to include on the questionnaire have been misunderstood. Occasionally, someone who is not in the census population universe, such as a foreign resident or a fictitious person, may, incorrectly, be enumerated in the census. On average, overcoverage is less likely to occur than undercoverage and, as a result, counts of dwellings and persons are likely to be slightly underestimated.

In 1991, four studies were undertaken to measure different aspects of coverage error. First, a sample of dwellings listed as vacant was revisited to verify that they really were vacant on Census Day. Adjustments have been made to the final census counts for households and persons missed because their dwelling was incorrectly classified as vacant. Second, a sample of persons enumerated as temporary residents was selected to verify whether or not they were enumerated at their usual place of residence. Based on this sample, estimates were obtained of the number of persons missed because they were temporarily absent from their usual place of residence. Corresponding adjustments were made to the final population counts. Despite these adjustments, the final counts are still subject to some undercoverage. For Canada as a whole and for each province and territory, the magnitude of this residual undercoverage in the 1991 Census is being measured by means of a special study known as the Reverse Record Check. Undercoverage tends to be higher for certain segments of the population such as young adult males and recent immigrants. The fourth study, known as the Overcoverage Study, is designed to investigate overcoverage errors. The results of the Reverse Record Check and the Overcoverage Study, when taken together, furnish an estimate of net undercoverage.

### Other Non-Sampling Errors

While coverage errors affect the number of units in the various census universes, other errors affect the characteristics of those units.

Sometimes, it is not possible to obtain a complete response from a household, even though the dwelling was identified as occupied and a questionnaire dropped off. The household members may have been away throughout the census period or, in rare instances, the householder may have refused to complete the form. More frequently, the questionnaire is returned but information is missing for some questions or individuals. Considerable effort is devoted to ensure as complete a response as possible. Census representatives edit the questionnaires and follow up on missing information. The Census Representative's work is then checked by both a supervisor and a quality control technician. Despite this, at the end of the collection stage, a small number of responses is still missing. Although missing entries are eliminated during processing by replacing a missing value by

the corresponding entry for a "similar" record, there remain some potential **non-response errors**. This is particularly serious if the non-respondents differ in some respects from the respondents, since this procedure will result in **non-response bias**.

Even when a response is obtained, it may not be entirely accurate. The respondent may have misinterpreted the question or may have guessed the answer, especially when answering on behalf of another, possibly absent, household member. Such errors are referred to as **response errors**. While response errors usually arise from inaccurate information provided by respondents, they can also result from mistakes by the Census Representative when completing certain parts of the questionnaire, such as structural type of dwelling, or when calling back to obtain a missing response.

Some of the questions on the census document require a written response. During processing, these "write-in" entries are given a numeric code. **Coding errors** can occur, especially when the code list is extensive (as with, for example, language, ethnic origin, industry and occupation), and when the written response is ambiguous, incomplete or difficult to read. Coding errors are controlled, though not completely eliminated, by verifying a sample of the codes and taking corrective action where necessary. For the first time in 1991, much of the coding was automated, partly in an effort to reduce the extent of coding errors.

The information on the questionnaires is key-entered onto a computer file. Two procedures are used to control the number of **data capture errors**. First, certain edits (such as range checks) are performed as the data are keyed. Second, a sample from each batch of documents is re-keyed and compared with the original entries. If there is more than a specified number of errors among the original entries, the whole batch is re-keyed.

Once the data have been captured, they are sent to Ottawa where they undergo a series of computer checks to identify missing or inconsistent responses. In the case of inconsistent responses, it has first to be decided which response is to be considered invalid. Invalid or missing responses must then be replaced by valid responses, that is, responses which are consistent with other data on the record. For a small proportion of cases, the correct response can be inferred from other data on the record. In most cases, however, this is not possible and a valid response is obtained from a "donor" record selected at random from among a group of consistent records which are similar to the invalid record in terms of a number of related characteristics. There is, of course, no guarantee that the imputed value will necessarily be the correct response for the individual concerned. However, provided the missing or invalid records are similar, on average, to the valid records, any **imputation errors** will more or less cancel out when results are tabulated for a sufficiently large geographic area or population subgroup.

Various studies are being carried out to evaluate the quality of the responses obtained in the 1991 Census. For each question, response rates and edit failure rates have been calculated. These can be useful in identifying the potential for non-response and other errors. Also, tabulations from the 1991 Census have been or will be compared with corresponding estimates from previous censuses, from sample surveys (such as the Labour Force Survey) and from various administrative records (such as

birth registrations and municipal assessment records). Such comparisons can indicate potential quality problems or at least discrepancies between the sources.

In addition to these aggregate-level comparisons, there are some micromatch studies in progress, in which census responses are compared with another source of information at the individual record level. For certain "stable" characteristics (such as age, sex, mother tongue, place of birth), the responses obtained in the 1991 Census, for a sample of individuals, are being compared with those for the same individuals in the 1986 Census. Also, following the 1991 Census, a sample of persons was re-enumerated, primarily to determine overcoverage rates. At the same time, however, interviewers asked a series of detailed questions on language, ethnic origin and marital status; the responses will be compared with the corresponding census responses in order to identify, and hopefully understand, response errors.

### Sampling Errors

Estimates obtained by weighting up responses collected on a sample basis are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error introduced by sampling will vary according to the relative scarcity of the characteristics in the population. For large cell values, the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values, this potential error, as a proportion of the cell value, will be relatively large.

The potential error due to sampling is usually expressed in terms of the so-called "standard error". This is the square root of the average, taken over all possible samples of the same size and design, of the squared deviation of the sample estimate from the value for the total population.

The table below provides approximate measures of the standard error due to sampling. These measures are intended as a general guide only.

**Table: Approximate Standard Error Due to Sampling for 1991 Census Sample Data**

Cell Value	Approximate Standard Error
50 or less	15
100	20
200	30
500	45
1,000	65
2,000	90
5,000	140
10,000	200
20,000	280
50,000	450
100,000	630
500,000	1400

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value corresponding to the cell value that is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000, the range would be  $1,000 \pm 3 \times 65$  or  $1,000 \pm 195$ ).

The standard errors given in the table above will not apply to population or universe (persons, households, dwellings or families) totals or subtotals for the geographic area under consideration (see Sampling and Weighting). The effect of sampling for these cells can be determined by comparison with a corresponding 100% publication.

The effect of the particular sample design and weighting procedure used in the 1991 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the table may, therefore, understate or overstate the error due to sampling.

For further information on the quality of census data, contact the Social Survey Methods Division at Statistics Canada, Ottawa, Canada KIA 0T6 (613) 951-6940.

### Confidentiality and Random Rounding

The figures shown in the tables have been subjected to a confidentiality procedure known as "random rounding". This is done to prevent the possibility of associating statistical data with any identifiable individual. Under this method, all figures including totals are randomly rounded either up or down to a multiple of "5", and in some cases "10". While providing strong protection against disclosure, this technique does not add significant error to the census data. However, there are some consequences for the users. Since totals are independently

rounded, they do not necessarily equal the sum of individually rounded figures in distributions. Also, minor differences can be expected in corresponding totals and cell values in various census tabulations. Similarly, percentages, which are calculated on rounded figures, do not necessarily add up to 100. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. It should also be noted that small cell counts may suffer a significant distortion as a result of random rounding. Individual data cells containing small numbers may lose their precision as a result.

Users should be aware of possible data distortions when they are aggregating these rounded data. Imprecisions as a result of rounding tend to cancel each other out when data cells are reaggregated. However, users can minimize these distortions by using, whenever possible, the appropriate subtotals when aggregating.

For those requiring maximum precision, the option exists to use custom tabulations. With custom products, aggregation is done using individual census database records. Random rounding occurs only after the data cells have been aggregated, thus minimizing any distortion.

In addition to random rounding, **area suppression** has been adopted to further protect the confidentiality of individual responses.

**Area suppression** results in the deletion of all characteristic data for geographic areas with populations below a specified size. The extent to which data are suppressed depends upon the following factors:

- if the data are tabulated from the 100% database, suppression is based upon the total population;
- if the data are tabulated from the 20% sample database, suppression is based upon the non-institutional population;
- if the data contain an income distribution, those areas with populations below 250 persons are suppressed;
- if the data **do not** contain an income distribution, those areas with a population of less than 40 persons are suppressed.

In all cases, suppressed data are included in the appropriate higher aggregate subtotals and totals.

This technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic summary tabulations, semi-custom and custom data products) collected on a 100% or 20% sample basis.

## Sampling and Weighting

The 1991 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly. Note that, on most Indian reserves and remote areas, all data were collected on a 100% basis.

For any given geographic area, the weighted population, household, dwelling or family total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

## Special Notes

### Population Counts Based on Usual Residence

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada, as well as those considered "non-permanent residents" (see note on this group). In most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

### Non-permanent Residents

In 1991, for the first time, the census of population included both permanent and non-permanent residents of Canada. Non-permanent residents are persons who hold student or employment authorizations, Minister's permits or who are refugee claimants.

Prior to 1991, only permanent residents of Canada were included in the census. (The only exception to this was 1941.) Non-permanent residents were considered foreign residents and were not enumerated.

Today in Canada, non-permanent residents make up a growing segment of the population. Their presence can affect the demand for such government services as health care, schooling and employment programs. The inclusion of non-permanent residents in the 1991 Census will also facilitate comparisons with provincial and territorial statistics (marriages, divorces, births and deaths) which include this population. In addition, the census definition is now closer to the United Nations' recommendation that long-term residents (persons living in a country for one year or longer) be enumerated.

Total population counts, as well as counts for all variables, will be affected by this change in the 1991 Census universe. According to the 1991 Census, there were 223,410 non-permanent residents in Canada, representing slightly less than 1% of the total population. Users should be especially careful when comparing data from 1991 and previous censuses in geographic areas where there is a concentration of non-permanent residents. These include the major metropolitan areas of Ontario, British Columbia and Quebec.

Although every attempt was made to enumerate non-permanent residents, the completeness of enumeration of this population was below that achieved for permanent residents. Factors such as language difficulty and a reluctance to complete a

government form or understand the need to participate, may have affected the enumeration of non-permanent residents and resulted in undercounting.

### Incompletely Enumerated Indian Reserves and Indian Settlements

On some Indian reserves and Indian settlements in the 1991 Census, enumeration was not permitted or was interrupted before it could be completed. Moreover, some Indian reserves and Indian settlements were enumerated late or the quality of the collected data was considered inadequate. These geographic areas (a total of 78) are called incompletely enumerated Indian reserves and Indian settlements.

Data for 1991 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of these reserves and settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for the affected geographic areas, comparisons (e.g., percentage change) between 1986 and 1991 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can be significant for smaller areas, where the affected reserves and settlements account for a higher proportion of the population.

A list of incompletely enumerated Indian reserves and Indian settlements along with Population and Occupied Private Dwelling Counts from the last two censuses (where available) has been compiled and is shown in Appendix 1.

### Structural Type of Dwelling

Movable dwellings, one category of structural type of dwellings, were suspected to be under-reported in the 1991 Census. This is thought to be due to the misclassification of a number of Mobile Homes as other structural types. For large geographic areas, this error is not expected to have a significant impact upon other dwelling categories because of the relatively large number of dwellings in that area. However, for small geographic areas, the impact may be more pronounced.

### Home Language and Mother Tongue

For the 1991 Census, the question on language spoken at home read as follows: "What language does this person speak **most often** at home?" The expression "**most often**" replaced the term "usually" which had been used in 1981 and in 1986. The instruction accompanying the question ("If more than one language, which language do you speak most often?") was suppressed in 1991. As for the question on mother tongue, it was expressed in the following terms: "What is the language that this person **first learned** at home in **childhood** and **still understands**?" This wording is similar to that used for the 1986 Census, except for the insertion of the expression "at home". Furthermore, an instruction was added in 1991 following the question: "If this person no longer understands the first language learned, indicate the second language learned". In 1986, this instruction was found in the guide which accompanied the questionnaire.

The short questionnaire (2A) of the 1991 Census, which was completed by four households in five, contained only one language question, that is the one on mother tongue. This question bore the title **Language First Learned at Home in Childhood**. The question on home language appeared on the long questionnaire (2B) which was given to one household in five. This questionnaire contained four language questions.

The title **Language** preceded these questions. The question on home language appeared after the two questions on knowledge of languages (official and non-official) and preceded the question on mother tongue. In 1986, the question on the language spoken at home (question 18) came before the one on the knowledge of the official languages (question 19), but it appeared well after the question on the mother tongue (question 6).

Changes to the collection and processing of data affect figures for both mother tongue and home language. First of all, in 1991, the boxes corresponding to the three most frequent non-official languages were deleted from the questionnaire. The only two check boxes were the ones referring to English and French; other language responses were recorded by means of a write-in answer space. Up to two of these write-in responses could be processed. For the first time, in 1991, these answers were coded using an automatic process. Among other things, this reduced the time needed for coding and solved the problem of classification that affected certain language categories such as Aboriginal and Indo-Iranian languages (refer to the section entitled **Special Notes** in the 1986 publication **Language: Part 1**, number 93-102 in the catalogue).

Some changes have also been incorporated in the language classifications used in publications. In 1991, the Sino-Tibetan, Tai and Austro-Asiatic language families were added. Furthermore, certain residual categories have been added to existing language families, such as "Germanic languages, n.i.e." (n.i.e.: not included elsewhere) and "Dravidian, n.i.e.". Moreover, because of the small number of respondents reporting them, certain native languages which were identified in 1986 have been included in the category "Athapaskan languages, n.i.e." in 1991. Finally, an important change was made to the "Algonquian languages, n.i.e." category. In 1991 this category contains the Ojibwe language, which was assigned to Cree or Ojibway in 1986.

The number of non-responses to the question on the language spoken at home remained stable between the 1986 and 1991 censuses (315,000 individuals). As for the proportion of non-responses, it went from 1,3% to 1,2%. Except for the Yukon, provincial and territorial rates have decreased between 1986 and 1991.

Non-responses and invalid responses were corrected during data processing. A summary analysis reveals that this operation did not significantly change the distributions. However, the proportion of answers assigned is between 5% and 9,9% for Frisian, Danish, Icelandic, Norwegian, Kurdish, Sinhalese, Sino-Tibetan languages, not included elsewhere (n.i.e.), Khmer, Austro-Asiatic languages, n.i.e., Semitic languages, n.i.e., Swahili, Cree, Montagnais-Naskapi,

Algonquian languages, n.i.e. and Wakashan languages; between 10% and 14,9% for Swedish, Welsh, Ojibway, Malecite, Tsimshian and Amerindian languages, n.i.e.; and between 15%

and 19.9% for Gaelic languages and African languages, n.i.e. Furthermore, the proportion of assigned responses exceeds 20% for four languages: North Slave (Hare), Mohawk, Salish languages and Haida. Analysts are advised to be careful when using the data on these languages.

The table shown as follows gives the main response categories of the questions on mother tongue and home language. Statistics are taken from the long questionnaire (distributed to 20% of households).

	Mother Tongue			Home Language		
	1981	1986	1991	1981	1986	1991
Total population	100.0	100.0	100.0	100.0	100.0	100.0
Single responses	97.8	96.6	98.8	97.8	95.4	98.2
English	60.4	60.6	59.9	66.9	66.3	67.5
French	25.2	24.3	24.1	24.2	23.2	23.0
Non-official languages	12.2	11.6	14.8	6.6	5.9	7.7
Multiple responses	2.2	3.4	1.2	2.2	4.6	1.8

In the case of mother tongue and home language, a notable increase took place for single answers from 1986 to 1991. This was accompanied, of course, by a substantial decrease in the number and proportion of multiple responses. These changes are probably largely attributable to the order in which the language questions appeared on the long questionnaire. Respondents would have less of a tendency to declare more than one language for the answer categories relating to language most often spoken at home and mother tongue if they could first indicate their language knowledge.

In 1991, statistics on mother tongue which were taken from the long questionnaire sometimes presented significant differences in relation to the data taken from the short questionnaire. For more information concerning this matter, consult the **Content Considerations** section of the publication **Mother Tongue: 20% Sample Data**, number 93-333 in the catalogue.

Time comparisons become a rather delicate issue due to the changes in certain aspects of the collection and processing of data on mother tongue and home language from one census to the next. Therefore, users are advised to exercise caution when analysing trends.

## Median Calculation

The procedure to estimate medians has been changed from that used in previous censuses and in the initial release of income data from the 1991 Census, specifically Catalogue 93-331, *Selected Income Statistics*. The new procedure employs a much larger number of income groups and provides a more accurate estimate of the median value. For this reason, medians calculated using the new method will differ slightly from those previously published or from those calculated from distribution shown in a publication.

## Income Data

Average income, median income and standard error of average income of population 15 years and over are calculated for persons with income only, but are calculated for all census

families and private households whether or not they reported any income. Aggregate income calculated from these data should be used with caution as averages were calculated prior to rounding. Medians have been calculated from unpublished grouped data.

Income size distributions by various characteristics for the population 15 years and over, census families, non-family persons, economic families, unattached individuals and private households in Canada, provinces, territories and CMA's are published in separate reports.

Census income statistics are subject to sampling variability. Although such sampling variability may be quite small for large population groups, its effects cannot be ignored in the case of very small subgroups of population in an area or in a particular category. This is because, all other things being equal, the smaller the sample size, the larger the error. For this reason, income data for areas, where the non-institutional population was below 250, have been suppressed. However, where statistics are not suppressed but are still based on relatively small totals, the readers are strongly advised to exercise caution in the use and interpretation of these statistics.

## Number of Weeks Worked

The data for the 40-48 and 49-52 weeks worked categories for 1990 must be interpreted with caution because some respondents tend to exclude their paid leave of absence due to vacation or for other reasons from their work weeks, when in fact such leave of absence should be included. As a result, the 49-52 week category may be understated.

## Labour Force Activity

The census labour force activity concepts have not changed between 1986 and 1991. However, the processing of the data was modified, causing some differences. In the 1991 Census, a question on school attendance was asked. This question was not asked in 1986. It was used to edit the labour force activity variable, specifically unemployment. Consequently, the processing differences affect the unemployed population and

are mostly concentrated among the 15-19 age group. The table below indicates the magnitude of the effect upon the data, at the Canada level.

#### Labour Force Activity, 1991 Census of Canada

Canada	1991 Census (as published in 1991)	1991 Census (using 1986 processing)
Labour force 15 years and over	14,474,940	14,535,850
Employed	13,005,505	13,005,500
Unemployed	1,469,440	1,530,350
Not in the labour force	6,829,795	6,768,885
Labour force 15-19 years	904,370	948,260
Employed	766,260	766,260
Unemployed	138,110	182,005
Not in the labour force	967,865	923,965
Labour force 20 years and over	13,570,575	13,587,590
Employed	12,239,240	12,239,245
Unemployed	1,331,330	1,348,350
Not in the labour force	5,861,940	5,844,925

The second non-response rate is calculated in the same way as the global non-response rate except that it uses only the housing questions exclusive to the long questionnaire. This rate is calculated only for the released tabulations. The magnitude of this housing non-response rate is indicated in tabulations as follows:

Less than 25%: no indication

25% or more: ◇

Tabulations of housing questions with a white diamond are published but should be used with extreme caution due to the high non-response rates for these questions. It should be noted that in some cases both black and white diamonds may appear.

Because high non-response is a very localized phenomenon, data that are not released at the CSD, CT and EA levels are still included in tabulations at all higher geographic levels. These tabulations are not subject to any particular note.

#### Data Quality Index for Census Subdivisions, Census Tracts and Enumerations Areas

In general, the census has been able to obtain accurate population and dwelling counts and to maintain high response rates to census questions for all geographic areas in Canada. However, some census subdivisions, mostly Indian reserves and Indian settlements, have very high non-response rates for some census questions despite the fact that accurate population and dwelling counts were obtained.

A data quality index based on two non-response rates is given for some census subdivisions (CSDs), census tracts (CTs) and enumeration areas (EAs) to reflect this situation. The first non-response rate is a global rate equal to the percentage of required responses left unanswered by respondents. All published census questions exclusive to the long questionnaire were used in the calculation of this global rate (in the case of income only total income and wages and salaries were used). The magnitude of this global rate is indicated in tabulations as follows:

Less than 5%: no indication

5% to less than 25%: ◆

25% or more: ◆◆

Tabulations for CSDs, CTs and EAs with a black diamond should be used with caution. Tabulations for CSDs, CTs and EAs with two black diamonds (a global non-response rate of 25% or more) are not released.

## Other Related Products

The 1991 Census product line is designed to serve the diverse needs of our users. A wide range of products and services are available from the 1991 Census of Population. They are organized into five categories:

- (1) **Reference Products** are designed to make census products and services easier to use by helping clients identify their needs and to find and interpret the data.
- (2) **Data Products** present a wide range of census data for standard geographical areas, covering social, cultural and economic characteristics of Canadians.
- (3) **Analytical Products** provide an interpretation of the 1991 Census data covering a variety of topics or themes, and present the findings in easy-to-read publications.
- (4) **Tabulation Services** provide tabulations aimed at meeting users' needs in a more detailed or specific form than is available in standard products.
- (5) **Workshops and Seminars** are offered to inform new and current data users about census data and to assist them in maximizing the value of census data to meet their needs.

To obtain more detailed information on the products and services available from the census, refer to the **1991 Census Catalogue**, Catalogue No. 92-302E. As well, you may contact your nearest Regional Reference Centre listed in the "Contacts" section of this publication.

Listed below are other products with presentation and content similar to this publication.

## Regional Reference Centres

Statistics Canada's regional reference centres provide a full range of census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase publications, microcomputer diskettes, microfiche, maps and more.

The staff of the regional reference centres provides consultative and research services in addition to providing after-sales service and support, including seminars and workshops on the use of Statistics Canada information.

Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems CANSIM and E-STAT. A telephone inquiry service is also available with toll-free numbers for regional users outside local calling areas. Call, write, fax or visit the nearest regional reference centre for more information.

### Atlantic Region

Serving the provinces of Newfoundland and Labrador, Nova Scotia, Prince Edward Island and New Brunswick.

Advisory Services

## Additional References and Services

In addition to being available through Regional Reference Centres and depository libraries, Statistics Canada publications may be ordered through your **local bookstore** or **subscription agent**. Contact the nearest Regional Reference Centre for a list of Canadian outlets available, or consult the 1991 Census Catalogue (Catalogue No. 92-302E).

Secondary distributors offer data access and analytical support through a variety of consulting and computer-based services not available at Statistics Canada. The names and addresses of licensed distributors may be obtained from any Regional Reference Centre.

Statistics Canada provides **digital geographic products** which allow computer manipulation of geographic data. A customized retrieval service is available for users who wish to define their own geographic area of study. A variety of data retrieval files and services provide flexibility in selecting a geographic base.

A complete description of available digital files and services is documented in the 1991 Census Catalogue (Catalogue No. 92-302E).

Information concerning **census of agriculture products and services** may be found in the 1991 Census of Agriculture Products and Services publication, Catalogue No. 92-303, or by calling toll free 1-800-465-1991.

Users with special data requirements may request **post-census survey services**. Data are made available on microcomputer diskettes for use with spreadsheet software, or on paper output. For additional information, please contact the nearest Regional Reference Centre.

CANSIM, Statistics Canada's computerized database network and information retrieval service provides users with access to current and historical statistics in various forms including specialized data manipulation and analysis packages, graphics facilities and a bibliographic search service. For more information about CANSIM, contact the Marketing Division or any Regional Reference Centre.

## Définitions

Seul un résumé des définitions des termes géographiques et des concepts du recensement est présenté ici. Les utilisateurs doivent consulter le **Dictionnaire du recensement de 1991** (n° 92-301F au catalogue) pour les définitions complètes et les observations additionnelles pertinentes.

## Activité

Activité sur le marché du travail des personnes en âge de travailler qui, au cours de la semaine ayant précédé le 4 juin 1991, étaient **occupées** ou **chômeuses**. Les autres personnes en âge de travailler sont classées dans la catégorie des **Inactifs**. Les données portent sur les personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel.

## Âge

Âge au dernier anniversaire de naissance (à la date de référence du recensement, soit le 4 juin 1991). Cette variable est établie d'après la réponse à la question sur la date de naissance qui demande le jour, le mois et l'année de naissance. Les personnes qui ne connaissaient pas la date exacte de leur naissance devaient donner la meilleure estimation possible.

## Âge à l'immigration

Âge du recensé lorsqu'il a obtenu pour la première fois le statut d'immigrant reçu. Un immigrant reçu est une personne qui n'a pas la citoyenneté canadienne par naissance, mais à laquelle les autorités canadiennes de l'immigration ont accordé le droit de vivre ici en permanence.

## Catégorie de travailleurs

(Également connu sous *Statut professionnel*)

Variable permettant de classer les personnes qui ont déclaré un emploi selon (i) qu'elles ont surtout travaillé contre rémunération, à commission ou contre rémunération en nature, (ii) qu'elles ont travaillé sans rémunération pour un parent du même ménage dans une entreprise ou une ferme familiale ou (iii) qu'elles ont travaillé surtout à leur compte, avec ou sans aide rémunérée. L'emploi déclaré désigne l'emploi qu'elles occupaient au cours de la semaine ayant précédé le dénombrement ou, si elles n'ont pas travaillé au cours de cette semaine, l'emploi qu'elles ont occupé le plus longtemps depuis le 1<sup>er</sup> janvier 1990. Les personnes ayant occupé deux emplois ou plus cette semaine-là devaient donner des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures.

**Nota :** Dans les publications des recensements de 1971 et de 1981, les travailleurs autonomes dont l'entreprise est constituée en société sont normalement inclus dans la catégorie des travailleurs rémunérés afin de permettre des comparaisons avec les données tirées des enquêtes auprès des établissements et celles du Système de comptabilité nationale. Dans les publications des recensements de 1986 et de 1991, les travailleurs autonomes dont la ferme ou l'entreprise est

constituée en société sont présentés séparément lorsque l'espace le permet.

## Chambres à coucher

Pièces conçues et meublées pour servir de chambres à coucher et utilisées principalement pour y dormir, même si ce n'est qu'à l'occasion (une chambre d'ami par exemple).

## Chômeurs

Personnes qui, pendant la semaine ayant précédé le recensement (4 juin 1991) :

- a) étaient sans travail, mais avaient cherché un emploi au cours des quatre semaines précédentes et étaient prêtes à travailler ;
- b) avaient été mises à pied mais prévoyaient reprendre leur emploi ;
- c) avaient pris des dispositions précises en vue de se présenter à un nouvel emploi dans les quatre semaines suivantes.

Les données portent sur les personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel.

## Circonscription électorale fédérale (CÉF)

Une circonscription électorale fédérale est un endroit ou un territoire dont les habitants sont en droit d'élire un député à la Chambre des communes (source : Loi électorale du Canada, 1990). Selon l'Ordonnance de représentation de 1987, il y a 295 CÉF au Canada.

Les circonscriptions électorales fédérales sont définies selon les critères suivants :

- (1) les limites légales et les descriptions sont du ressort du directeur général des élections et sont publiées dans la Gazette du Canada;
- (2) les limites des CÉF sont généralement révisées tous les 10 ans d'après les résultats du recensement décennal.

## Citoyenneté

Statut légal de citoyen du recensé. Les personnes ayant plus d'une citoyenneté devaient en faire état dans leur réponse.

## Connaissance des langues non officielles

Indique la ou les langues autres que le français ou l'anglais dans lesquelles le recensé peut soutenir une conversation.

Les données provenant de la question sur les langues non officielles se fondent sur une auto-évaluation par les recensés de leur capacité de parler une ou plusieurs langues non officielles.

## Connaissance des langues officielles

Indique si le recensé peut soutenir une conversation en français seulement, en anglais seulement, en français et en anglais, ou dans aucune des deux langues officielles du Canada.

Les données provenant de la question sur la langue officielle se fondent sur une auto-évaluation par les recensés de leur capacité de parler l'une ou l'autre des deux langues officielles, ou les deux.

### État du logement

Variable indiquant si, selon le répondant, le logement nécessite des réparations (à l'exception des rénovations ou ajouts souhaités).

L'entretien régulier correspond à des travaux comme la peinture ou le nettoyage du système de chauffage. Des réparations mineures sont nécessaires dans les cas suivants : carreaux de plancher détachés ou manquants, briques descellées, bardeaux arrachés, marches, rampes ou revêtement extérieur défectueux, etc. Il faut effectuer des réparations majeures lorsque la plomberie ou l'installation électrique est défectueuse, que la charpente des murs, des planchers ou des plafonds doit être réparée, etc.

### État matrimonial (légal)

Situation conjugale d'une personne.

#### Légalement marié(e) (et non séparé(e))

Personne dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé.

#### Légalement marié(e) et séparé(e)

Personne qui a été abandonnée par son conjoint ou qui a quitté parce qu'elle ne voulait plus vivre avec cette personne, mais qui n'a pas obtenu de divorce.

#### Divorcé(e)

Personne qui a obtenu un divorce et qui ne s'est pas remariée.

#### Veuf(ve)

Personne dont le conjoint est décédé et qui ne s'est pas remariée.

#### Célibataire (jamais marié(e))

Personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans), ou personne dont le mariage a été annulé et qui ne s'est pas remariée.

### Famille de recensement

Couple actuellement marié (avec ou sans fils et/ou filles jamais mariés des deux conjoints ou de l'un d'eux), couple vivant en union libre (avec ou sans fils et/ou filles jamais mariés des deux partenaires ou de l'un d'eux) ou parent seul (peu importe son état matrimonial) demeurant avec au moins un fils ou une fille jamais marié.

### Famille économique

Groupe de deux personnes ou plus qui vivent dans le même logement et qui sont apparentées par le sang, par alliance, par union libre ou par adoption.

### Fécondité

Nombre d'enfants nés vivants de femmes âgées de 15 ans ou plus.

### Fréquentation scolaire

Fréquentation à plein temps ou à temps partiel (le jour ou le soir) d'une école, d'un collège ou d'une université au cours de la période de neuf mois allant de septembre 1990 au 4 juin 1991. La fréquentation est comptée seulement pour les cours permettant d'accumuler des crédits en vue de l'obtention d'un certificat, d'un diplôme ou d'un grade.

### Immigrant reçu

Personne qui n'a pas la citoyenneté canadienne par naissance, mais à laquelle les autorités canadiennes de l'immigration ont accordé le droit de vivre au Canada en permanence.

La question sur le statut d'immigrant reçu, conjointement à la question sur la citoyenneté, permet aux utilisateurs des données du recensement de distinguer la population des non-immigrants, la population des immigrants et les résidents non permanents. Pour obtenir plus de renseignements sur ces populations, reportez-vous aux figures 3A et 3B dans le Dictionnaire du recensement de 1991, n° 92-301F au catalogue.

### Inactifs

Personnes qui, pendant la semaine ayant précédé le recensement, ne voulaient pas ou ne pouvaient pas travailler compte tenu des conditions existant sur le marché du travail. Les inactifs incluent les personnes qui avaient cherché du travail au cours des quatre semaines précédentes, mais qui n'étaient pas prêtes à travailler pendant la semaine de référence, de même que les personnes qui n'avaient pas travaillé, n'avaient pas d'emploi auquel elles devaient se présenter au cours des quatre semaines suivant la semaine de référence et n'avaient pas été temporairement mises à pied ni n'avaient cherché de travail pendant cette période. Les données portent sur les personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel.

### Industrie (selon la Classification type des industries de 1980)

Nature générale de l'activité de l'établissement où travaille le recensé, déterminée par le nom de l'employeur et par le genre d'entreprise, d'industrie ou de service. Les données portent sur les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel. Si le recensé n'avait pas d'emploi au cours de la semaine ayant précédé le dénombrement, il devait donner des renseignements sur l'emploi qu'il avait occupé le plus longtemps depuis le 1<sup>er</sup> janvier 1990. Les personnes qui avaient deux emplois ou plus devaient fournir des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures de travail.

Les données sur l'industrie tirées du recensement sont groupées selon la Classification type des industries (CTI) de 1980; il s'agit d'une classification à trois niveaux d'agrégation :

18 divisions (identifiées A à R) qui se subdivisent en 75 grands groupes et, par la suite, en 296 groupes de base.

Il est possible de procéder à des comparaisons directes des données sur l'industrie tirées des recensements de 1991 et 1986, en se fondant sur la CTI de 1980.

Il est possible de procéder à des comparaisons directes des données de 1991 et 1986 avec les données sur l'industrie tirées des recensements de 1981 et 1971, en se fondant sur la Classification des activités économiques de 1970.

Pour plus de détails à ce sujet, voir la définition de la variable Travail : Industrie (selon la Classification des activités économiques de 1970) dans le Dictionnaire du recensement de 1991, n° 92-301F au catalogue.

## Langue parlée à la maison

Langue que le recensé parlait le plus souvent à la maison au moment du recensement.

## Lieu de naissance

Province ou territoire de naissance, pour les personnes nées au Canada, ou pays de naissance, pour les personnes nées à l'extérieur du Canada.

## Lieu de travail

Lieu de travail habituel des personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1<sup>er</sup> janvier 1990. Les variables se rapportent habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé depuis le 1<sup>er</sup> janvier 1990, les données portent sur l'emploi occupé le plus longtemps au cours de cette période.

## Logement privé

Ensemble distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor, un vestibule ou un escalier commun à l'intérieur. L'entrée doit donner accès au logement sans que l'on ait à passer par les pièces d'habitation de quelqu'un d'autre. Le logement doit répondre aux trois conditions qui le rendent propre à l'habitation durant toute l'année :

- (1) avoir une source de chauffage ou d'énergie (comme en atteste la présence d'une cheminée, de fils électriques, de tuyaux ou compteurs pour l'huile [le mazout] ou le gaz, d'une génératrice, de bois de chauffage, d'ampoules électriques, de panneaux solaires, etc.);
- (2) avoir accès à une source d'eau potable toute l'année (comme en atteste la présence de robinets, de tuyaux d'écoulement, d'un puits, d'une pompe à eau, etc.);
- (3) fournir un espace clos permettant de s'abriter des intempéries (comme en atteste la présence de murs d'enceinte et d'un toit ainsi que de portes et fenêtres offrant une protection contre le vent, la pluie et la neige).

## Logement privé occupé

Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement. Les données qui ont trait aux logements privés occupés uniquement par des résidents étrangers et/ou temporaires ne sont toutefois pas incluses.

## Loyer brut

Total des montants mensuels moyens versés par les ménages locataires au titre de l'habitation.

## Ménage privé

Personne ou groupe de personnes (autres que des résidents étrangers) occupant un logement privé et n'ayant pas de domicile habituel ailleurs au Canada.

## Mobilité – Lieu de résidence 1 an auparavant

La mobilité est déterminée d'après le lien entre le domicile habituel d'une personne le jour du recensement et son domicile habituel un an plus tôt. Il s'agit d'une **personne n'ayant pas déménagé** si son domicile n'a pas changé dans l'intervalle ; sinon, il s'agit d'une **personne ayant déménagé**. Cette distinction correspond au sous-univers Mobilité (1 an auparavant). Dans la catégorie des **personnes ayant déménagé**, on peut également distinguer les **migrants infraprovinciaux**, les **migrants interprovinciaux** et les **migrants externes**.

Les **personnes n'ayant pas déménagé** sont celles qui, le jour du recensement, demeuraient à la même adresse que celle où elles résidaient un an plus tôt.

Les **personnes ayant déménagé** sont celles qui, le jour du recensement, demeuraient à une autre adresse que celle où elles résidaient un an plus tôt.

Les **migrants infraprovinciaux** sont des personnes ayant déménagé qui, le jour du recensement, demeuraient à une autre adresse mais dans la même province ou le même territoire que celui ou celle où elles résidaient un an plus tôt.

Les **migrants interprovinciaux** sont des personnes ayant déménagé qui, le jour du recensement, demeuraient dans une province ou un territoire autre que celui ou celle où elles résidaient un an plus tôt.

Les **migrants externes** sont des personnes ayant déménagé qui demeuraient au Canada le jour du recensement, mais qui résidaient à l'extérieur du Canada un an plus tôt.

## Mobilité – Lieu de résidence 5 ans auparavant

La mobilité est déterminée d'après le lien entre le domicile habituel d'une personne le jour du recensement et son domicile habituel cinq ans plus tôt. Il s'agit d'une **personne n'ayant pas déménagé** si son domicile n'a pas changé dans l'intervalle ; sinon, il s'agit d'une **personne ayant déménagé**. Cette distinction correspond au sous-univers Mobilité (5 ans auparavant).

auparavant). Dans la catégorie des **personnes ayant déménagé**, on peut également distinguer les **non-migrants** et les **migrants**; cette distinction correspond au «statut migratoire».

Les **personnes n'ayant pas déménagé** sont celles qui, le jour du recensement, demeuraient à la même adresse que celle où elles résidaient cinq ans plus tôt.

Les **personnes ayant déménagé** sont celles qui, le jour du recensement, demeuraient à une autre adresse que celle où elles résidaient cinq ans plus tôt.

Les **non-migrants** sont des personnes ayant déménagé qui, le jour du recensement, demeuraient à une autre adresse mais dans la même subdivision de recensement (SDR) que celle où elles résidaient cinq ans plus tôt.

Les **migrants** sont des personnes ayant déménagé qui, le jour du recensement, résidaient toujours au Canada mais dans une subdivision de recensement différente de celle où elles résidaient cinq ans plus tôt (**migrants internes**), ou des personnes qui résidaient à l'extérieur du Canada cinq ans auparavant (**migrants externes**). Les **migrants internes** sont divisés en deux catégories : les **migrants infraprovinciaux** qui ont déménagé dans une autre SDR dans la même province et les **migrants interprovinciaux** qui ont déménagé dans une autre province.

Les **migrants externes** sont des personnes ayant déménagé qui demeuraient au Canada le jour du recensement, mais qui résidaient à l'extérieur du Canada cinq ans plus tôt.

## Mode d'occupation

Indique si le logement est possédé ou loué par un membre du ménage, ou s'il s'agit d'un logement de bande (dans une réserve ou un établissement indien).

Un logement est classé «possédé» même s'il est hypothéqué ou grevé d'une autre créance. Le logement peut être situé sur un terrain donné ou pris en location, ou encore faire partie d'un condominium (immeuble en copropriété) enregistré ou non.

Un logement est classé «loué» même s'il est donné en location sans loyer en argent ou à un loyer réduit, ou s'il fait partie d'une coopérative. Aux fins du recensement, tous les membres d'une coopérative ont des parts dans cette coopérative et occupent leur logement en vertu d'un bail.

Pour des raisons historiques et légales, l'occupation des logements dans des réserves ne se prête pas à la classification habituelle du mode d'occupation. Une catégorie spéciale **logement de bande** a donc été créée pour les produits du recensement de 1991.

## Origine ethnique

Groupe(s) ethnique(s) ou culturel(s) auquel (auxquels) appartenaient les ancêtres du répondant. L'origine ethnique ou culturelle se rapporte à l'origine des ancêtres, aux «racines» ethniques de la population, et ne doit pas être confondue avec la citoyenneté ou la nationalité.

Il convient de souligner qu'antérieurement au recensement de 1981, les recensés devaient déclarer uniquement les antécédents ethniques ou culturels du côté paternel. Même si plusieurs origines ethniques avaient été déclarées, une seule était saisie; autrement dit, une seule origine ethnique était retenue pour chaque recensé. En 1981, cette restriction a été supprimée de façon à tenir compte des origines multiples. Dans le questionnaire de 1981, un espace était prévu pour une réponse en lettres, en plus des cases de réponse. Dans le questionnaire de 1986, les recensés pouvaient déclarer trois origines ethniques en plus de celles qui étaient proposées dans les cases de réponse. En 1991, ils pouvaient indiquer deux origines ethniques ne figurant pas dans les cercles de réponse.

Dans le questionnaire de 1991, la question est légèrement différente de celle de 1986. En 1991, on demandait aux recensés : «À quel(s) groupe(s) ethnique(s) ou culturel(s) les ancêtres de cette personne appartenaient-ils?» En 1986, on a demandé aux recensés : «À quel(s) groupe(s) ethnique(s) ou culturel(s) appartenez-vous ou vos ancêtres appartenaient-ils?»

L'ordre des cases de réponse a été changé de façon à mieux rendre compte de l'évolution des effectifs des groupes ethniques selon les réponses uniques au recensement de 1986.

## Pensionnaire d'un établissement institutionnel

Résident d'un logement collectif «institutionnel», autre qu'un membre du personnel et sa famille.

Les logements collectifs «institutionnels» comprennent les foyers collectifs pour enfants et les orphelinats, les maisons de repos, les hôpitaux pour personnes souffrant de maladies chroniques, les foyers pour personnes âgées, les hôpitaux, les hôpitaux psychiatriques, les centres de traitement et établissements pour handicapés physiques, les établissements pénitentiaires et établissements de correction, les foyers pour jeunes contrevenants et les prisons.

## Période de construction

Période au cours de laquelle l'immeuble ou le logement a été construit.

## Période d'immigration

Tranches d'années établies d'après les réponses à la question sur l'année d'immigration.

## Personnes occupées

Personnes qui, au cours de la semaine ayant précédé le 4 juin 1991:

- avaient fait un travail quelconque, à l'exclusion des travaux ménagers, des travaux d'entretien ou des réparations dans leur propre logement et du travail bénévole ;
- étaient temporairement absentes de leur travail ou de l'entreprise à cause d'un conflit de travail, d'une maladie ou d'une incapacité temporaire, de vacances, ou encore pour d'autres raisons.

Les données portent sur les personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel.

## Pièces

Nombre de pièces dans un logement. Une pièce est un espace fermé à l'intérieur d'un logement, fini et habitable toute l'année.

## Plus haut niveau de scolarité atteint

Dernière année d'études primaires ou secondaires, terminée ou non, ou dernière année universitaire ou non universitaire terminée. Dans la hiérarchie de la scolarité, les études universitaires sont classées au-dessus des autres études non universitaires. En outre, la personne qui a obtenu un grade, certificat ou diplôme se trouve classée à un échelon au-dessus de celle qui a un nombre d'années de scolarité plus élevé, terminées ou non, mais qui n'a pas de titre scolaire.

## Population active expérimentée

Personnes qui, au cours de la semaine ayant précédé le 4 juin 1991, étaient occupées ou en chômage et avaient travaillé depuis le 1er janvier 1990. On détermine la population active expérimentée en retranchant de la population active totale les chômeurs âgés de 15 ans ou plus qui n'ont jamais travaillé ou qui ont travaillé seulement avant le 1er janvier 1990.

## Population active inexpérimentée

Personnes en chômage âgées de 15 ans ou plus qui n'avaient jamais travaillé ou qui avaient travaillé seulement avant le 1er janvier 1990.

## Population active totale

Personnes qui étaient, soit occupées, soit en chômage pendant la semaine ayant précédé le recensement (le 4 juin 1991). Les données portent sur les personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel.

## Population des immigrants

Personnes ayant le statut d'immigrant reçu au Canada, ou l'ayant déjà eu. Un immigrant reçu est une personne qui n'a pas la citoyenneté canadienne par naissance, mais à laquelle les autorités canadiennes de l'immigration ont accordé le droit de vivre au Canada en permanence. Pour obtenir plus de renseignements sur la population des immigrants, reportez-vous aux figures 3A et 3B dans le Dictionnaire du recensement de 1991, n° 92-301F au catalogue.

## Population des non-immigrants

Personnes qui sont citoyens canadiens par naissance. Pour obtenir plus de renseignements sur la population des non-immigrants, reportez-vous aux figures 3A et 3B dans le Dictionnaire du recensement de 1991, n° 92-301F au catalogue.

## Présence d'enfants

La variable Présence d'enfants classe les femmes de 15 ans et plus dans les ménages privés dans les catégories «Avec enfants à la maison» et «Sans enfants à la maison». Les femmes avec des enfants à la maison sont classées d'après les groupes d'âge de leurs enfants.

Le terme «enfant» désigne les fils et filles apparentés par le sang, par alliance ou par adoption qui ne se sont jamais mariés, peu importe leur âge, dans les familles de recensement (dans les ménages privés), qui vivent dans le même logement que leur(s) parent(s). Les fils et filles qui sont mariés ou qui l'ont déjà été, ou qui vivent en union libre, ne sont pas considérés comme des membres de la famille de recensement de leur(s) parent(s), même s'ils vivent dans le même logement qu'eux.

## Principales dépenses de propriété

Total des paiements mensuels moyens versés par les ménages propriétaires au titre de l'habitation.

## Principales dépenses de propriété ou loyer brut, sous forme de pourcentage du revenu du ménage

Proportion du revenu mensuel total moyen du ménage en 1990 consacrée aux principales dépenses de propriété (dans le cas des logements occupés par leur propriétaire) ou au loyer brut (dans le cas des logements occupés par un locataire). Voici comment ces résultats sont obtenus :

a) Logements non agricoles occupés par leur propriétaire :

$$\frac{\text{Principales dépenses de propriété}}{(\text{Revenu annuel total du ménage en 1990})/12} \times 100 = \text{---} \%$$

b) Logements non agricoles occupés par un locataire :

$$\frac{\text{Loyer brut}}{(\text{Revenu annuel total du ménage en 1990})/12} \times 100 = \text{---} \%$$

## Profession (selon la Classification type des professions de 1980)

Genre de travail que faisaient les personnes pendant la semaine de référence. Le genre de travail exécuté est défini d'après le type d'emploi occupé par le recensé et la description des tâches les plus importantes qui s'y rattachent. Les données ont trait aux personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel. Si le recensé n'avait pas d'emploi au cours de la semaine ayant précédé le dénombrement, les données portent sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 1990. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

Les données sur la profession sont groupées selon la structure de la classification de 1980 à trois niveaux d'agrégation : 22

grands groupes qui se subdivisent en 80 sous-groupes et, par la suite, en 514 groupes de base.

Comme la Classification type des professions de 1980 a été utilisée également dans le cadre des recensements de 1981 et de 1986 pour classer les données sur la profession, il est possible d'établir des comparaisons directes avec les données de 1991. Pour ce qui est des comparaisons avec les données de 1971, il faut apporter certaines modifications à l'univers de la population active et **seules** les données sur la profession classées selon La classification des professions de 1971 peuvent être utilisées. Pour de plus amples renseignements, reportez-vous à la définition de la variable Travail : Profession (selon La classification des professions de 1971) dans le Dictionnaire du recensement de 1991 (n° 92-301F au catalogue).

## Religion

Confession religieuse ou appartenance à un groupe ou organisme religieux, à une secte, à un culte ou à toute autre collectivité ayant adopté une religion ou un système de croyances quelconque.

## Résidents non permanents

Personnes qui sont titulaires d'un permis de séjour pour étudiants, d'un permis de travail ou d'un permis ministériel, ou qui revendiquent le statut de réfugié. Pour obtenir plus de renseignements sur cette population, reportez-vous à la section «Notes spéciales» et aux figures 3A et 3B dans le Dictionnaire du recensement de 1991, n° 92-301F au catalogue.

## Revenu : Catégorie de revenu

Situation de la famille économique ou de la personne hors famille économique âgée de 15 ans ou plus par rapport aux seuils de faible revenu (SFR) de Statistique Canada.

## Revenu : Composition du revenu

La composition du revenu total d'un groupe au sein d'une population ou d'une région géographique correspond à la part relative que représente chaque source de revenu ou groupe de sources de revenu, exprimée en pourcentage du revenu agrégé de ce groupe ou de cette région.

Pour la série "Profile", trois groupes de sources de revenu ont été utilisées; le revenu d'emploi incluant les salaires et traitements et le revenu net provenant d'un travail autonome agricole et non-agricole; les transferts gouvernementaux qui incluent tout les transferts provenant des différents palliers de gouvernement et qui ont été couvert dans une source de revenu distincte; les autres revenus incluant les revenus d'investissement, les revenus de pension et les autres sources de revenu. Voir "sources de revenu" pour la description de chaque source de revenu.

## Revenu : Fréquence des unités à faible revenu

Proportion ou pourcentage de familles économiques ou de personnes hors famille économique dans une catégorie donnée

dont le revenu est inférieur aux seuils de faible revenu. Ces taux de fréquence sont calculés d'après des estimations non arrondies des familles économiques et des personnes hors famille économique âgées de 15 ans et plus. Comme tous les membres d'une famille économique sont dans la même situation, la fréquence des unités à faible revenu est également calculée pour la population dans les ménages privés.

## Revenu : Revenu d'emploi

Revenu total reçu en 1990 par les personnes âgées de 15 ans ou plus sous forme de rémunération, de revenu net dans une entreprise non agricole non constituée en société et/ou dans l'exercice d'une profession et de revenu net provenant d'un travail autonome agricole.

## Revenu : Revenu moyen, revenu médian et erreur type

### Revenu moyen

Revenu total moyen pondéré d'un groupe d'unités (particuliers, familles ou ménages) qui est calculé à partir de données non arrondies en divisant le revenu total du groupe (p. ex., les hommes de 45 à 54 ans, les familles monoparentales où le parent est de sexe féminin, les ménages comptant une seule personne) par le nombre d'unités dans ce groupe.

Dans le cas des particuliers, le revenu moyen n'est calculé que pour les particuliers ayant touché un revenu (positif ou négatif). Dans tous les autres cas, toutes les unités, qu'elles aient touché ou non un revenu, sont incluses dans le calcul.

Ce concept et cette procédure s'appliquent au revenu total, au revenu d'emploi, aux salaires et traitements et à n'importe quelle autre composante du revenu.

### Revenu médian

Valeur centrale séparant en deux parties égales la répartition par tranches de revenu d'un groupe donné d'unités, la première moitié regroupant les unités ayant un revenu inférieur à la médiane, et la seconde, les unités ayant un revenu supérieur à la médiane.

Dans le cas des particuliers, le revenu médian n'est calculé que pour les particuliers ayant touché un revenu (positif ou négatif). Dans tous les autres cas, toutes les unités, qu'elles aient touché ou non un revenu, sont incluses dans le calcul.

Ce concept et cette procédure s'appliquent au revenu total, au revenu d'emploi, aux salaires et traitements et à n'importe quelle autre composante du revenu.

### Erreur type de revenu moyen

Estimation de l'erreur type de revenu moyen. Il s'agit d'une estimation de l'erreur introduite dans les données en raison du fait qu'elles sont recueillies auprès d'un échantillon aléatoire composé de seulement un ménage sur cinq. Lorsqu'il utilise ces chiffres, l'utilisateur peut être raisonnablement certain que la vraie valeur du revenu moyen (c.-à-d. la valeur qu'on aurait obtenue si l'on n'avait pas procédé par échantillonnage) se situe à plus ou moins deux fois l'erreur type et pratiquement certain qu'elle se situe à plus ou moins trois fois l'erreur type. Ces

estimations de l'erreur type ne tiennent pas compte des effets de certains types d'erreurs de réponse ni des effets des erreurs systématiques ou des erreurs de couverture.

### Revenu : Seuils de faible revenu (SFR)

Les mesures du faible revenu appelées seuils de faible revenu (SFR) ont été établies pour la première fois au Canada en 1968, d'après les données sur le revenu du recensement de 1961 et les régimes de dépenses des familles en 1959. À cette époque, les régimes de dépenses indiquaient que les familles canadiennes consacraient environ 50 % de leur revenu à la nourriture, au logement et à l'habillement. On a arbitrairement estimé que les familles consacrant 70 % ou plus de leur revenu à ces biens de première nécessité sont « dans le besoin ». À partir de cette hypothèse, des seuils de faible revenu ont été établis pour cinq différentes tailles de famille.

Par la suite, les seuils de faible revenu ont été révisés d'après les données nationales sur les dépenses des familles pour 1969, 1978 et 1986. Selon ces données, les familles canadiennes consacraient en moyenne 42 % de leur revenu aux biens de première nécessité en 1969, contre 38,5 % en 1978 et 36,2 % en 1986. En ajoutant la différence initiale de 20 points au niveau de base des dépenses au chapitre des biens de première nécessité, de nouveaux seuils de faible revenu ont été fixés selon la taille de la famille et le degré d'urbanisation. Depuis, ces

seuils de faible revenu ont été mis à jour chaque année d'après les changements subis par l'indice des prix à la consommation.

Aux fins des statistiques sur le faible revenu, les familles économiques et les personnes seules résidant au Yukon, dans les Territoires du Nord-Ouest et dans les réserves indiennes ne sont pas prises en compte. Les seuils de faible revenu s'inspiraient de certaines tendances "dépenses-revenu" que les données d'enquête ne fournissaient pas pour la population entière.

Pour déduire la fréquence des unités à faible revenu, on utilise le critère "taille de la région", lequel diffère selon qu'il s'agit du recensement ou de l'enquête sur les finances des consommateurs. Pour le recensement, la taille de la région est en effet déterminée par la population totale des secteurs de dénombrement urbains contigus (un secteur de dénombrement est considéré comme urbain en fonction de la densité de la population). Pour l'enquête sur les finances des consommateurs, on prend des RMR ou des AR et on détermine la taille de la région selon la population totale comprise dans les limites de ces RMR ou AR. Les répercussions globales de cette différence sont négligeables.

La matrice des seuils de faible revenu de 1990, basées sur les seuils révisés de 1986 et ajustées en fonction des changements de l'indice des prix à la consommation, figure ci-après:

**Seuils de faible revenu pour les familles économiques et les personnes hors famille économique, 1990**

Taille du secteur de résidence					
Taille de la famille	500,000 et plus	100,000 à 499,999	30,000 à 99,999	Petites régions urbaines	Régions rurales (agricoles et non agricoles)
1	14,155	12,433	12,146	11,072	9,637
2	19,187	16,854	16,464	15,008	13,064
3	24,389	21,421	20,926	19,076	16,605
4	28,081	24,662	24,094	21,964	19,117
5	30,680	26,946	26,324	23,997	20,887
6	33,303	29,248	28,573	26,047	22,672
7 et plus	35,818	31,460	30,734	28,017	24,385

### Revenu : Sources de revenu

On a demandé à toutes les personnes de 15 ans ou plus de déclarer leur revenu total en espèces tiré des sources suivantes au cours de l'année civile 1990.

#### a) Salaires et traitements

Salaires et traitements bruts avant les retenues pour l'impôt sur le revenu, les pensions, l'assurance-chômage, etc. Sont compris les soldes et les indemnités militaires, les pourboires, les commissions, les gratifications et les gains provenant de tout genre d'emploi occasionnel réalisés durant l'année civile 1990. Est exclue la valeur des allocations et avantages imposables fournis gratuitement par l'employeur tels que le logement ou l'utilisation d'un véhicule automobile.

#### b) Revenu net dans une entreprise non agricole non constituée en société et/ou dans l'exercice d'une profession

Revenu net (recettes brutes moins les dépenses d'exploitation, telles que les salaires, les loyers et l'amortissement) provenant de l'exploitation d'une entreprise non agricole non constituée en société ou dans l'exercice d'une profession pour son propre compte, durant l'année civile 1990. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus le revenu net des personnes qui gardent des enfants à leur propre domicile, celui des exploitants d'entreprises de distribution directe, par exemple pour la vente et la livraison de produits de beauté, ainsi que le revenu que les artistes, les écrivains, les professeurs de musique, les coiffeurs et coiffeuses, les couturiers et couturières tirent de leurs activités autonomes.

c) Revenu net provenant d'un travail autonome agricole

Revenu net (recettes brutes provenant de la vente de produits agricoles, moins l'amortissement et les frais d'exploitation) tiré de l'exploitation d'une ferme, pour son propre compte ou en association, durant l'année civile 1990. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus dans le revenu net les subventions, les paiements supplémentaires ou les paiements anticipés versés aux agriculteurs par les administrations fédérale et provinciales. Par contre, la valeur du revenu en nature, comme les produits agricoles cultivés et consommés à la ferme, n'est pas incluse.

d) Pension de sécurité de la vieillesse et supplément de revenu garanti

Pensions de sécurité de la vieillesse et suppléments de revenu garanti versés, par l'administration fédérale seulement, aux personnes âgées de 65 ans et plus et aux conjoints de 60 à 64 ans des bénéficiaires de prestations de sécurité de la vieillesse, durant l'année civile 1990. Sont incluses les allocations au conjoint survivant versées aux veufs et aux veuves âgés de 60 à 64 ans.

e) Prestations du Régime de rentes du Québec ou du Régime de pensions du Canada

Prestations reçues au cours de l'année civile 1990 en vertu du Régime de rentes du Québec ou du Régime de pensions du Canada, par exemple les pensions de retraite, les prestations de survivant et les pensions d'invalidité. Sont exclues les prestations de décès versées sous forme forfaitaire.

f) Allocations familiales

Allocations versées durant l'année civile 1990 par les administrations fédérale et provinciales pour les enfants à charge de moins de 18 ans. Pour les résidents du Québec, les «allocations pour les enfants de moins de 6 ans» et les «allocations à la naissance» sont comprises. Le montant de ces allocations n'a pas été déclaré directement par le répondant; il a été calculé et inclus dans le revenu d'un des parents.

g) Crédits d'impôt fédéral pour enfants

Crédits d'impôt pour enfants accordés par l'administration fédérale pendant l'année civile 1990 pour les enfants à charge âgés de moins de 18 ans. Le montant de ces crédits n'a pas été déclaré directement par le répondant; il a été calculé et inclus dans le revenu d'un des parents.

h) Prestations d'assurance-chômage

Total des prestations d'assurance-chômage reçues au cours de l'année civile 1990, avant les retenues d'impôt sur le revenu. Sont incluses les prestations de maladie, de maternité, de pêcheurs, de travail partagé, de recyclage et de retraite reçues en vertu du programme fédéral d'assurance-chômage.

i) Autre revenu provenant de sources publiques

Tous les transferts, à l'exclusion de ceux qui sont compris dans une source de revenu distincte (allocations familiales, crédits d'impôt fédéral pour enfants, pensions de sécurité de la vieillesse et suppléments de revenu garanti, prestations du Régime de rentes du Québec ou du Régime de pensions du Canada et prestations d'assurance-chômage), reçus des administrations fédérale, provinciales et municipales durant l'année civile 1990. Cette source comprend les paiements d'aide sociale versés aux personnes nécessiteuses comme les mères ayant des enfants à charge, les personnes incapables au travail de façon temporaire ou permanente, les personnes âgées, les aveugles et les personnes ayant une incapacité. Sont également inclus les suppléments de revenu versés par les administrations provinciales aux personnes âgées, qui s'ajoutent à la pension de sécurité de la vieillesse et au supplément de revenu garanti, ainsi que les subventions versées aux personnes âgées par l'administration provinciale pour compenser les frais de logement. Sont aussi inclus d'autres paiements de transfert, par exemple les prestations reçues en vertu du Programme de la planification d'emploi, les pensions et allocations aux anciens combattants, les pensions aux veuves et aux personnes à charge des anciens combattants et les indemnités d'accidents du travail. Enfin, sont aussi inclus tous les montants reçus en 1990 pour les crédits d'impôt remboursables par les provinces, le crédit pour la taxe fédérale sur les ventes et le crédit pour la taxe fédérale sur les produits et services.

j) Dividendes et intérêts d'obligations, de dépôts et de certificats d'épargne et autre revenu de placements

Intérêts perçus durant l'année civile 1990 au chapitre des dépôts dans des caisses populaires, des banques, des sociétés fiduciaires, des coopératives, des caisses d'épargne et de crédit, etc., et intérêts des certificats d'épargne, des obligations garanties et non garanties ainsi que tous les dividendes de sources canadiennes et étrangères. Comprend également les autres revenus de placements provenant de sources canadiennes ou étrangères tels que les revenus nets provenant d'une propriété, les intérêts sur prêts et hypothèques, le revenu régulier provenant d'une succession ou d'un fonds de fiducie et les intérêts sur polices d'assurance.

k) Pensions de retraite et rentes

Tout revenu ordinaire reçu durant l'année civile 1990 à la suite d'une participation à un régime de retraite d'un ou de plusieurs employeurs. Sont inclus les paiements reçus de toutes les rentes, y compris les paiements reçus en vertu d'un régime enregistré d'épargne-retraite (REÉR) venu à échéance et perçus sous forme de rente viagère, de rente à échéance fixe, d'un fonds enregistré de revenu de retraite ou d'un contrat de rente à versements invariables; les pensions versées aux veuves ou à d'autres parents de pensionnés décédés; les pensions des fonctionnaires et des membres des Forces armées ou d'officiers de la Gendarmerie royale du Canada (GRC) à la retraite; les rentes du Fonds des rentes du gouvernement canadien, d'une compagnie d'assurance, etc. Sont exclus les prestations de décès sous

forme forfaitaire, les prestations et les retraits globaux d'un régime de pensions ou d'un REÉR ou les remboursements de cotisations payées en trop.

**l) Autre revenu en espèces**

Revenu ordinaire reçu durant l'année civile 1990 qui n'a pas été déclaré dans l'une des neuf autres sources indiquées sur le questionnaire, par exemple, pension alimentaire, soutien d'un enfant, soutien périodique reçu de personnes non membres du ménage, revenu net provenant de chambreurs et de pensionnaires, revenu reçu de l'étranger (sauf les dividendes et intérêts), bourses d'études non remboursables, indemnités de cessation d'emploi, redevances et indemnités de grève.

**Recettes non comptées comme revenu**

Le concept de revenu exclut les gains et les pertes au jeu, les sommes forfaitaires reçues en héritage au cours de l'année, les gains et les pertes en capital, le produit de la vente d'une propriété ou de biens personnels, les remboursements d'impôt sur le revenu, les paiements de prêt reçus ou remboursés, les règlements monétaires forfaitaires d'assurance, les remboursements d'impôt foncier et autres taxes, les remboursements de cotisations à un régime de pensions ainsi que les revenus en nature tels que les repas et l'hébergement gratuits ou les produits agricoles cultivés et consommés à la ferme.

**Revenu total**

Le revenu total est la somme des montants reçus par une personne en 1990, provenant des sources de revenu susmentionnées.

**Revenu : Revenu total**

Revenu total, en espèces, reçu par les personnes âgées de 15 ans ou plus durant l'année civile 1990, provenant des sources suivantes :

Total des salaires et traitements

Revenu net dans une entreprise non agricole non constituée en société et/ou dans l'exercice d'une profession

Revenu net provenant d'un travail autonome agricole

Allocations familiales

Crédits d'impôt fédéral pour enfants

Pension de sécurité de la vieillesse et supplément de revenu garanti

Prestations du Régime de rentes du Québec ou du Régime de pensions du Canada

Prestations d'assurance-chômage

Autre revenu provenant de sources publiques

Dividendes et intérêts d'obligations, de dépôts et de certificats d'épargne et autre revenu de placements

Pensions de retraite et rentes

Autre revenu en espèces

**Revenu : Revenu total de la famille de recensement**

Somme des revenus totaux de tous les membres d'une famille de recensement donnée. De même, le revenu d'une famille provenant d'une source ou de plusieurs sources données est la somme des revenus de tous les membres de la famille qui proviennent de cette source ou de ces sources.

**Revenu : Revenu total du ménage**

Somme des revenus totaux de tous les membres du ménage.

**Semaines travaillées, à plein temps ou à temps partiel, en 1990**

Variable s'appliquant aux personnes qui ont travaillé en 1990. Ces dernières devaient préciser si elles avaient travaillé des semaines complètes (30 heures ou plus par semaine) ou non en 1990. Les personnes qui avaient un emploi à temps partiel pendant une partie de l'année et un emploi à plein temps pendant l'autre partie devaient répondre en fonction de l'emploi pour lequel elles avaient travaillé le plus grand nombre de semaines. Les données portent sur les personnes âgées de 15 ans ou plus qui ont travaillé en 1990, à l'exclusion des pensionnaires d'un établissement institutionnel.

**Sexe**

Qualité d'homme ou de femme.

**Taux d'activité**

Pourcentage de la population active totale (pendant la semaine de référence) par rapport à la population âgée de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel. Le taux d'activité d'un groupe donné (âge, sexe, état matrimonial, région géographique, etc.) correspond au nombre d'actifs dans ce groupe exprimé en pourcentage de la population de ce groupe.

**Taux de chômage**

Pourcentage de la population active en chômage par rapport à la population active totale (pendant la semaine de référence). Le taux de chômage d'un groupe donné (âge, sexe, état matrimonial, région géographique, etc.) correspond au nombre de chômeurs dans ce groupe exprimé en pourcentage de la population active dans ce groupe. Les données portent sur les personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel.

**Travail en 1990**

Variable indiquant le nombre de semaines au cours desquelles les personnes ont travaillé en 1990, à plein temps ou à temps partiel. Les individus qui ont travaillé de 49 à 52 semaines, surtout à plein temps, sont classés comme étant travailleurs à plein temps toute l'année.

## Valeur du logement

Montant en dollars que s'attendrait à recevoir le propriétaire s'il vendait son logement.

## Qualité des données

### Généralités

Le recensement de 1991 a été une entreprise complexe et de grande envergure. Bien que l'on ait déployé des efforts considérables pour assurer le respect des normes élevées tout au cours des opérations de la collecte et du traitement, il est inévitable que les estimations résultantes soient entachées d'erreurs. Il faut que les utilisateurs des données du recensement sachent que ces erreurs existent et qu'ils aient une idée générale de ses principales composantes afin d'être en mesure de déterminer si les données produites peuvent leur être utiles et d'évaluer les risques auxquels ils s'exposent en tirant des conclusions ou en prenant des décisions à partir de ces données.

Des erreurs peuvent se produire pratiquement à toutes les étapes du recensement, depuis la préparation des documents jusqu'au traitement des données, en passant par l'établissement des listes de logements et la collecte des données. Certaines erreurs, qui surviennent plus ou moins au hasard, ont tendance à s'annuler lorsque les réponses fournies par les divers répondants sont agrégées pour un groupe assez important. Dans le cas des erreurs de cette nature, l'estimation correspondante sera d'autant plus précise que le groupe visé sera grand. C'est pourquoi on conseille aux utilisateurs de faire preuve de prudence lorsqu'ils utilisent des estimations relatives à de petits groupes. Toutefois, certaines erreurs peuvent survenir de façon plus systématique et introduire un «biais» dans les estimations. Comme ce biais persiste quelle que soit la taille du groupe pour lequel les réponses sont agrégées et comme il est particulièrement difficile d'en mesurer l'importance, les erreurs systématiques posent pour la plupart des utilisateurs de données des problèmes plus graves que les erreurs aléatoires mentionnées plus haut.

En ce qui concerne les données du recensement en général, les principaux types d'erreur sont les suivants :

- les **erreurs de couverture** qui se produisent lorsqu'on oublie des logements et/ou des personnes, qu'on les englobe à tort ou qu'on les compte deux fois;
- les **erreurs dues à la non-réponse** qui surviennent lorsque l'on n'a pu obtenir de réponses d'un petit nombre de ménages et/ou de personnes en raison d'une absence prolongée ou pour toute autre raison;
- les **erreurs de réponse** qui surviennent lorsque le répondant, ou parfois le recenseur, a mal interprété une question du recensement et a inscrit une mauvaise réponse;
- les **erreurs de traitement** qui peuvent se produire à diverses étapes, notamment au **codage**, lorsque les réponses en lettres sont converties en codes numériques; à la **saisie des données**, lorsque les préposés à l'entrée des données transfèrent sur bandes pour ordinateur les réponses figurant

au questionnaire du recensement; à l'**imputation**, lorsqu'une réponse «valide», mais pas nécessairement exacte, est insérée dans un enregistrement par l'ordinateur pour remplacer une réponse manquante ou «invalides» («valides» et «invalides» renvoient à la cohérence de la réponse, compte tenu des autres renseignements compris dans l'enregistrement);

- les **erreurs d'échantillonnage** qui s'appliquent uniquement aux questions supplémentaires figurant dans le questionnaire complet distribué à un échantillon de un cinquième des ménages; elles résultent du fait que les réponses à ces questions, une fois pondérées pour représenter l'ensemble de la population, diffèrent inévitablement des résultats que l'on aurait obtenus si l'on avait posé ces questions à tous les ménages.

Les types d'erreur mentionnés plus haut ont tous une composante aléatoire et une composante systématique. Toutefois, la composante systématique de l'erreur d'échantillonnage est d'ordinaire très petite comparativement à sa composante aléatoire. Dans le cas des autres erreurs non dues à l'échantillonnage, tant la composante aléatoire que la composante systématique peuvent être importantes.

### Erreurs de couverture

Les erreurs de couverture ont une incidence directe sur la précision des chiffres du recensement, c'est-à-dire sur la taille des divers univers du recensement : la population, les familles, les ménages et les logements. Bien que des mesures aient été prises pour corriger certaines erreurs identifiables, les chiffres définitifs sont toujours entachés d'une certaine erreur découlant du fait que des personnes ou des logements ont été oubliés, englobés à tort dans le recensement ou comptés deux fois.

L'oubli de logements ou de personnes se traduit par un **sous-dénombrement**. Des logements peuvent être oubliés en raison d'une mauvaise interprétation des limites du secteur de dénombrement (SD), ou du fait qu'ils sont cachés ou semblent inhabitables. Des personnes peuvent être oubliées parce que leur logement est oublié ou classé comme inoccupé ou quand certains membres du ménage sont omis sur le questionnaire parce que le répondant a mal interprété les instructions concernant les personnes à inclure. Enfin, certaines personnes peuvent être oubliées parce qu'elles n'ont pas de domicile habituel et qu'elles n'ont pas passé la nuit du recensement dans un logement.

Le dénombrement à tort ou le double compte de logements ou de personnes se traduit par un **surdénombrement**. Il peut y avoir surdénombrement des logements lorsque des constructions impropres à l'habitation sont classées comme logements ou lorsque des unités d'habitation ne répondant pas à la définition du logement retenue pour les fins du recensement sont comptées séparément plutôt que d'être considérées comme faisant partie d'un logement plus grand. Il peut y avoir double compte des logements lorsqu'il existe, par exemple, une certaine ambiguïté au sujet des limites des SD. Les personnes peuvent être comptées deux fois parce que leur logement a été compté deux fois ou parce que les lignes directrices concernant les personnes à inscrire dans le questionnaire ont été mal interprétées. À l'occasion, il arrive qu'une personne ne faisant

pas partie de l'univers du recensement, comme un résident étranger ou une personne fictive, soit dénombrée à tort. En moyenne, le surdénombrement est moins susceptible de se produire que le sous-dénombrement; les chiffres des logements et des personnes sont donc probablement légèrement sous-estimés.

En 1991, quatre études ont été entreprises afin d'évaluer les différents aspects de l'erreur de couverture. Premièrement, on a visité de nouveau un échantillon de logements classés comme inoccupés afin de vérifier s'ils étaient réellement inoccupés le jour du recensement. Les chiffres définitifs du recensement ont ensuite été corrigés pour tenir compte des personnes ou des ménages oubliés parce que leur logement a été classé par erreur comme inoccupé. Deuxièmement, on a prélevé un échantillon de personnes dénombrées comme résidents temporaires afin de vérifier si elles avaient ou non été dénombrées à leur domicile habituel. À partir de cet échantillon, on a établi des estimations du nombre de personnes oubliées parce qu'elles étaient temporairement absentes de leur domicile habituel, puis on a rectifié les chiffres définitifs de population en conséquence. Malgré ces rectifications, les chiffres définitifs sont encore sujets à un certain sous-dénombrement. Une troisième étude, connue sous le nom de contre-vérification des dossiers, est réalisée pour déterminer l'importance de ce sous-dénombrement résiduel, pour le Canada dans son ensemble ainsi que pour chaque province et territoire, à l'occasion du recensement de 1991. Le sous-dénombrement tend à être plus élevé pour certains segments de la population comme les jeunes adultes de sexe masculin et les personnes récemment immigrées. La quatrième étude, connue sous le nom d'étude du surdénombrement, a pour objet d'étudier les erreurs de surdénombrement. Ensemble, les résultats de la contre-vérification des dossiers et de l'étude du surdénombrement fournissent une estimation du sous-dénombrement net.

### Autres erreurs non dues à l'échantillonnage

Alors que les erreurs de couverture ont une incidence sur le nombre d'unités comprises dans les divers univers du recensement, les autres erreurs influent sur les chiffres relatifs aux caractéristiques de ces unités.

Il est parfois impossible d'obtenir une réponse complète d'un ménage, même si le logement a été classé comme étant occupé et un questionnaire a été livré. Il se peut que les membres du ménage aient été absents pendant toute la période du recensement ou, en de rares occasions, que le membre responsable du ménage ait refusé de remplir le questionnaire. Il arrive plus souvent que le questionnaire soit retourné, mais qu'il y manque des données à certaines questions ou pour certaines personnes. Des efforts considérables sont déployés afin d'obtenir une réponse la plus complète possible. Les recenseurs contrôlent les questionnaires et assurent un suivi à l'égard de l'information manquante. Le travail du recenseur est ensuite vérifié tant par un surveillant que par un technicien du contrôle qualitatif. Malgré tout, il existe toujours un petit nombre de réponses manquantes à la fin de l'étape de la collecte. Bien que les entrées manquantes soient éliminées en cours de traitement en remplaçant chaque valeur manquante par la valeur correspondante figurant dans un enregistrement «similaire», il est possible que certaines **erreurs de non-réponse** s'y glissent.

Cela est particulièrement grave lorsque les personnes non répondantes diffèrent des répondants sous certains aspects; en effet, cette procédure se traduira par l'introduction d'un **biais de non-réponse**.

Même lorsqu'une réponse est obtenue, il se peut qu'elle ne soit pas tout à fait exacte. Il est possible que le répondant ait mal interprété la question ou ait donné une réponse au jugé, surtout lorsqu'il répondait pour le compte d'un autre membre du ménage, qui était peut-être absent. Ces erreurs sont désignées sous le nom d'**erreurs de réponse**. Bien que ces erreurs surviennent d'ordinaire du fait que les répondants aient fourni des renseignements inexacts, elles peuvent aussi résulter d'erreurs commises par les recenseurs en remplissant certaines parties du questionnaire, comme le type de construction résidentielle, ou au moment du rappel effectué pour obtenir une réponse manquante.

Certaines questions du questionnaire du recensement nécessitent une réponse en lettres. Pendant le traitement, on attribue un code numérique à ces réponses. Il est possible que des **erreurs de codage** surviennent, surtout lorsque la liste de codes est longue (comme dans le cas de la langue, de l'origine ethnique, de l'industrie et de la profession) et que la réponse écrite est ambiguë, incomplète ou difficile à lire. On limite le nombre d'erreurs de codage, sans toutefois l'éliminer complètement, en vérifiant un échantillon des codes et en prenant des mesures correctives au besoin. Pour la première fois en 1991, une grande partie des tâches de codage ont été automatisées afin, entre autres, de réduire le nombre d'erreurs de codage.

Les renseignements figurant dans les questionnaires sont introduits sur clavier dans un fichier informatique. Deux méthodes de résolution ordonnée sont utilisées pour limiter le nombre d'**erreurs à la saisie des données**. Dans un premier temps, certains contrôles (comme des vérifications d'étendue) sont effectués à mesure que les données sont entrées. Dans un second temps, on introduit de nouveau sur clavier un échantillon tiré de chaque lot de documents, puis on compare les entrées résultantes aux entrées initiales. Si le nombre d'erreurs relevées au sein des entrées initiales dépasse un seuil prédéterminé, on reprend l'introduction sur clavier des données de tout le lot de documents.

Une fois les données saisies, elles sont envoyées à Ottawa où elles sont soumises à une série de contrôles informatiques visant à relever les réponses manquantes ou incohérentes. Dans le cas des réponses incohérentes, il faut d'abord définir ce que l'on entend par une réponse invalide. Les réponses invalides ou manquantes doivent ensuite être remplacées par des réponses valides, c'est-à-dire par des réponses qui sont compatibles avec les autres données figurant dans l'enregistrement. Dans un petit nombre de cas, il est possible de déduire la réponse correcte à partir des autres données de l'enregistrement. Toutefois, dans la majorité des cas, cela est impossible et on obtient une réponse valide à partir d'un enregistrement «donneur» prélevé au hasard parmi un groupe d'enregistrements cohérents qui sont pour un certain nombre de caractéristiques connexes similaires à celles de l'enregistrement invalide. Bien sûr, rien ne garantit que la valeur imputée sera nécessairement identique à la réponse correcte pour la personne concernée. Cependant, pour autant que les

enregistrements manquants ou invalides soient, en moyenne, similaires aux enregistrements valides, les **erreurs à l'imputation** s'annuleront plus ou moins une fois que les résultats auront été totalisés pour une région géographique ou un sous-groupe de population de taille suffisante.

Diverses études sont réalisées afin d'évaluer la qualité des réponses obtenues dans le cadre du recensement de 1991. Ainsi, on a calculé les taux de réponse et les taux de rejet au contrôle pour chaque question. Ces taux peuvent permettre de déterminer le potentiel de non-réponse et d'autres erreurs. De même, les totalisations établies à partir des données du recensement de 1991 ont été ou seront comparées avec les estimations correspondantes obtenues à partir des données des recensements précédents, des enquêtes-échantillon (comme l'Enquête sur la population active) et de divers dossiers administratifs (comme les registres des naissances et le cadastre municipal). Ces comparaisons peuvent permettre de cerner les problèmes de qualité éventuels ou, à tout le moins, de relever les divergences entre les sources.

Outre ces comparaisons entre données agrégées, certaines études de couplage de microdonnées sont actuellement menées afin de comparer les réponses de certains particuliers obtenues au recensement à celles d'une autre source de renseignements. Pour un certain nombre de caractéristiques «stables» (comme l'âge, le sexe, la langue maternelle, le lieu de naissance), on compare les réponses obtenues auprès d'un échantillon de personnes à l'occasion du recensement de 1991 aux réponses obtenues des mêmes personnes à l'occasion du recensement de 1986. De même, à la suite du recensement de 1991, un échantillon de personnes ont été dénombrées de nouveau surtout pour déterminer les taux de surdénombrement. En même temps, cela a permis aux intervieweurs de poser une série de questions détaillées sur la langue, l'origine ethnique et l'état matrimonial; les réponses données à ces questions seront comparées aux réponses correspondantes du recensement afin de reconnaître les erreurs de réponse et tenter de les comprendre.

### Erreurs d'échantillonnage

Les estimations obtenues en pondérant les réponses recueillies auprès d'un échantillon sont susceptibles d'être entachées d'erreurs en raison de la répartition des caractéristiques au sein de l'échantillon qui n'est généralement pas identique à la répartition correspondante au sein de la population dans laquelle l'échantillon a été prélevé.

L'erreur susceptible d'être introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique étudiée au sein de la population. Lorsque la valeur contenue dans la case est élevée, cette erreur sera relativement faible proportionnellement à cette valeur. Lorsque la valeur contenue dans la case est faible, cette erreur sera relativement importante proportionnellement à cette valeur.

L'erreur susceptible d'être introduite par l'échantillonnage est d'ordinaire exprimée sous forme d'«erreur type». Il s'agit de la racine carrée de la moyenne, calculée pour l'ensemble des échantillons de même taille prélevés selon le même plan d'échantillonnage, des carrés de l'écart de l'estimation obtenue

à partir de l'échantillon par rapport à la valeur pour l'ensemble de la population.

Le tableau ci-dessous fournit des mesures approximatives de l'erreur type due à l'échantillonnage. Ces mesures sont données uniquement à titre indicatif.

**Tableau : Erreur type approximative introduite par l'échantillonnage pour les données-échantillon du recensement de 1991**

Valeur contenue dans la case	Erreur type approximative
50 ou moins	15
100	20
200	30
500	45
1,000	65
2,000	90
5,000	140
10,000	200
20,000	280
50,000	450
100,000	630
500,000	1400

Les utilisateurs souhaitant déterminer l'erreur d'échantillonnage approximative pour une case de données dont la valeur a été obtenue à partir de l'échantillon de 20 % doivent choisir l'erreur type correspondant à l'entrée dans la colonne «Valeur contenue dans la case» ci-dessus qui se rapproche le plus de celle qui figure dans la case de données de la totalisation en cause. En utilisant la valeur ainsi obtenue pour l'erreur type, l'utilisateur peut, en général et à juste titre, être certain que la valeur réelle pour la population dénombrée (ne tenant pas compte des formes d'erreur autres que l'erreur d'échantillonnage) ne s'écarte pas de la valeur contenue dans la case dans une proportion supérieure ou inférieure à trois fois l'erreur type (p. ex., si la valeur contenue dans la case est 1,000, la fourchette à l'intérieur de laquelle se situe la valeur réelle serait de  $1,000 \pm 3 \times 65$  ou de  $1,000 \pm 195$ ).

Les erreurs types données dans le tableau ci-dessus ne s'appliquent pas aux *totaux* ou aux *totaux partiels* relatifs à la population ou aux univers (personnes, ménages, logements ou familles) pour la région géographique étudiée (voir Échantillonnage et pondération). On peut déterminer l'effet de l'échantillonnage pour ces valeurs en les comparant à celles des publications correspondantes contenant des données intégrales.

Il est à noter que l'effet du plan d'échantillonnage et de la méthode de pondération utilisés dans le cadre du recensement de 1991 variera d'une caractéristique à l'autre et d'une région géographique à l'autre. Il est donc possible que les valeurs de l'erreur type données dans le tableau ci-dessus sous-estiment ou surestiment l'erreur attribuable à l'échantillonnage.

Pour obtenir de plus amples renseignements sur la qualité des données du recensement, communiquer avec la Division des méthodes d'enquêtes sociales, Statistique Canada, Ottawa, Canada K1A 0T6, (613) 951-6940.

### Confidentialité et arrondissement aléatoire

Afin de protéger le caractère confidentiel des renseignements fournis, les chiffres indiqués aux tableaux ont fait l'objet d'un **arrondissement aléatoire** qui supprime toute possibilité d'associer des données statistiques à une personne facilement reconnaissable. Selon cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de 5 et dans certains cas, de 10. Cette technique assure une protection efficace contre la divulgation sans ajouter d'erreur significative dans les données du recensement. Cependant, elle entraîne certaines conséquences pour les utilisateurs. Comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis séparément dans les répartitions. De plus, il faut s'attendre à ce que les totaux et les autres chiffres correspondants dans diverses totalisations du recensement présentent quelques légères différences. De même, la somme des pourcentages, qui sont calculés à partir de chiffres arrondis, ne correspond pas forcément à 100. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. La distorsion importante pouvant résulter de l'arrondissement aléatoire dans le cas des cases de faible valeur mérite aussi d'être signalée. Cette distorsion peut entraîner une perte de précision pour les cases de données renfermant des chiffres peu élevés.

Les utilisateurs devraient, lors de l'agrégation des données arrondies, être conscients de cette distorsion. Les erreurs dues à l'arrondissement ont tendance à s'annuler lorsque les chiffres contenus dans les cases sont agrégés de nouveau. Cependant, il est possible de réduire les distorsions en intégrant dans la mesure du possible les totaux partiels appropriés dans les totalisations.

Les utilisateurs désirant obtenir un maximum de précision peuvent aussi choisir de demander des totalisations personnalisées. Dans le cas de produits personnalisés, l'agrégation se fait à partir des enregistrements dans la base de données du recensement se rapportant aux particuliers. L'arrondissement aléatoire a lieu uniquement après que les cases de données ont été agrégées, ce qui réduit la distorsion au minimum.

Outre l'arrondissement aléatoire, on a adopté d'autres techniques, comme la **suppression des régions**, afin d'assurer encore mieux la confidentialité des réponses des particuliers.

Dans le cadre de la **suppression des régions**, toutes les données caractéristiques se rapportant aux régions géographiques dont la population est inférieure à une taille donnée sont supprimées. L'importance de la suppression est fonction des facteurs suivants :

- si les données sont totalisées à partir d'une base de données intégrales, la suppression est fondée sur la population totale;

- si les données sont totalisées à partir d'une base de données-échantillon, la suppression est fondée sur la population excluant les pensionnaires d'établissements institutionnels;
- si les données renferment une répartition du revenu, on supprime les données relatives aux régions dont la population est inférieure à 250 personnes;
- si les données ne renferment **aucune** répartition du revenu, on supprime les données relatives aux régions dont la population est inférieure à 40 personnes.

Dans tous les cas, les données supprimées sont incluses dans les totaux ou totaux partiels du niveau d'agrégation supérieur approprié.

Cette technique est appliquée à tous les produits renfermant des données infraprovinciales (c.-à-d. la série des Profils, les tableaux sommaires de base, les produits personnalisés et semi-personnalisés), qu'il s'agisse de données intégrales ou de données-échantillon.

### Échantillonnage et pondération

Les données du recensement de 1991 sont soit des données intégrales (c.-à-d. recueillies auprès de l'ensemble des ménages), soit des données-échantillon (c.-à-d. recueillies auprès d'un échantillon aléatoire de ménages) que l'on a pondérées pour obtenir des estimations pour l'ensemble de la population. Les données du présent rapport ont été recueillies auprès d'un échantillon de 20 % et pondérées pour compenser pour l'échantillonnage. Tous les en-têtes de tableaux sont annotés en conséquence. On notera que, dans la plupart des réserves indiennes et les régions éloignées, toutes les données ont été recueillies auprès de l'ensemble de la population.

Il est possible que, pour une région géographique donnée, le total ou le total partiel pondéré de la population, des ménages, des logements ou des familles diffère du chiffre correspondant figurant dans les publications contenant des données intégrales. Ces variations (en plus de l'effet de l'arrondissement aléatoire) sont attribuables à l'échantillonnage.

### Notes spéciales

#### Chiffres de population basés sur la résidence habituelle

Les chiffres de population présentés ici pour les différentes régions géographiques indiquent le nombre de Canadiens qui y ont leur lieu habituel de résidence, sans égard au lieu où ils se trouvaient le jour du recensement. Sont également comptés les Canadiens séjournant dans un logement de la région en cause le jour du recensement et n'ayant pas de lieu habituel de résidence ailleurs au Canada, de même que ceux qui sont considérés comme des «résidents non permanents» (voir le nota au sujet de ce groupe). Dans la plupart des régions, il n'y a guère de différence entre le nombre de résidents habituels et le nombre de personnes séjournant dans la région le jour du recensement. Toutefois, dans certains endroits, comme les

lieux de villégiature et les régions où sont situés des camps de chantier importants, la différence entre ces deux chiffres peut être importante.

### Résidents non permanents

Pour la première fois en 1991, le recensement de la population inclut à la fois les résidents permanents et les résidents non permanents. Les résidents non permanents comprennent les titulaires d'un permis de séjour pour étudiants, d'un permis de travail, d'un permis ministériel et les revendicateurs du statut de réfugié.

Lors des recensements antérieurs, seuls les résidents permanents du Canada étaient inclus dans le recensement (exception faite pour 1941). Les résidents non permanents étaient considérés comme des résidents étrangers et n'étaient pas dénombrés.

Présentement au Canada, les résidents non permanents forment un segment croissant de la population. Leur présence peut avoir une influence sur la demande de services gouvernementaux tels que les soins de santé, l'éducation et les programmes d'emploi. L'inclusion des résidents non permanents au recensement de 1991 facilitera aussi la comparaison avec les statistiques provinciales et territoriales (mariages, divorces, naissances et décès) qui incluent cette population. En outre, la définition du recensement permet maintenant de mieux refléter la recommandation des Nations Unies, à savoir que les résidents à long terme (personnes demeurant dans un pays pour un an ou plus) soient dénombrés.

Le total des chiffres de population, de même que ceux de toutes les variables du questionnaire, seront touchés par ce changement à l'univers du recensement de 1991. D'après les résultats du recensement de 1991, il y avait 223 410 résidents non permanents au Canada, ce qui représente un peu moins de 1 % de la population totale. Les utilisateurs doivent faire preuve d'une très grande prudence lorsqu'ils comparent des données de 1991 avec celles de recensements antérieurs pour des régions géographiques où la concentration de résidents non permanents est importante. Celles-ci comprennent les principales régions métropolitaines de l'Ontario, de la Colombie-Britannique et du Québec.

Même si tous les efforts possibles ont été déployés pour dénombrer les résidents non permanents, le dénombrement de cette population n'est pas aussi complet que celui des résidents permanents. Des facteurs tels que les problèmes linguistiques et la réticence à remplir un formulaire du gouvernement ou de comprendre l'utilité de leur participation peuvent avoir influé sur le dénombrement des résidents non permanents et s'être traduits par un sous-dénombrement.

### Réserves indiennes et établissements indiens partiellement dénombrés

Lors du recensement de 1991, le dénombrement n'a pas été autorisé sur certaines réserves indiennes et établissements indiens ou a été interrompu avant d'être mené à terme. De plus, certaines réserves indiennes et établissements indiens ont été dénombrés tardivement ou la qualité des données recueillies a été jugée insuffisante. Ces régions géographiques (un total de

78) sont appelées réserves indiennes et établissements indiens partiellement dénombrés.

Les données de 1991 ne sont pas disponibles pour les réserves indiennes et les établissements indiens partiellement dénombrés et ne sont pas comprises dans les totalisations. Les données sur les régions géographiques ayant une ou plusieurs de ces réserves ou établissements font donc l'objet d'un nota approprié. En raison des données manquantes, les utilisateurs doivent prendre note que les comparaisons (p. ex., des variations en pourcentage) entre 1986 et 1991 ne sont pas exactes pour les régions géographiques en cause. L'effet des données manquantes est très faible pour les régions géographiques de niveau plus élevé (Canada, provinces, régions métropolitaines de recensement et agglomérations de recensement) mais peut être plus important pour les petites régions où les réserves et établissements indiens en cause représentent une proportion plus grande de la population.

Une liste des réserves indiennes et établissements indiens partiellement dénombrés en cause ainsi que les chiffres de la population et des logements privés occupés des deux derniers recensements (si les données sont disponibles) a été dressée et est présentée à l'annexe 1.

### Type de construction résidentielle

Les logements mobiles, un type de construction, n'ont probablement pas tous été déclarés au recensement de 1991. Cette situation est possiblement due au fait qu'un certain nombre d'habitations mobiles ont été classées par erreur avec d'autres types de construction résidentielle. Dans les grandes régions géographiques, cette erreur ne devrait pas affecter de façon significative les autres catégories de logement, étant donné le nombre de logements relativement plus élevé dans ces régions. Cependant, pour des régions géographiques plus restreintes, l'influence pourrait être plus marquée.

### Langue parlée à la maison et langue maternelle

La question sur la langue parlée à la maison était formulée comme suit au recensement de 1991 : «Quelle langue cette personne parle-t-elle le plus souvent à la maison?» L'expression «le plus souvent» a remplacé le terme «habituellement» qui avait été utilisé en 1981 et en 1986. L'instruction qui accompagnait la question («Si vous en parlez plus d'une, laquelle parlez-vous le plus souvent?») a été supprimée en 1991. Quant à la question sur la langue maternelle, elle était exprimée dans les termes suivants : «Quelle est la langue que cette personne a apprise en premier lieu à la maison dans son enfance et qu'elle comprend encore?» Cette formulation est identique à celle du recensement de 1986, à une différence près : l'insertion de l'expression «à la maison.» De plus, une instruction a été ajoutée en 1991 à la suite de la question : «Si cette personne ne comprend plus la première langue apprise, indiquez la seconde langue qu'elle a apprise.» En 1986, cette instruction se trouvait dans le guide accompagnant le questionnaire.

Le questionnaire abrégé (2A) du recensement de 1991, rempli par quatre ménages sur cinq, ne contenait qu'une seule question linguistique, celle sur la langue maternelle. Cette question était coiffée du titre **Première langue apprise à la maison dans**

**l'enfance.** La question sur la langue parlée à la maison apparaissait dans le questionnaire complet (2B), remis à un ménage sur cinq. Ce questionnaire contenait

quatre questions linguistiques; le titre **Langue** les précédait. La question sur la langue parlée à la maison figurait à la suite des deux questions sur la connaissance des langues (officielles et non officielles) et précédait la question sur la langue maternelle. En 1986, la question sur la langue parlée à la maison (question 18) précédait celle sur la connaissance des langues officielles (question 19), mais venait bien après celle sur la langue maternelle (question 6).

Les modifications apportées à la collecte et au traitement des données touchent tant la langue maternelle que la langue parlée à la maison. D'abord, en 1991, les cases correspondant aux trois langues non officielles les plus répandues ont été supprimées du questionnaire. Sauf pour l'anglais et le français qu'il suffisait de cocher, les réponses devaient donc être écrites dans l'espace prévu; si le cas se présentait, jusqu'à deux langues pouvaient être saisies. Pour la première fois en 1991, ces réponses ont été codées par un procédé automatique. Cela a permis, entre autres choses, de réduire le temps nécessaire au codage et de résoudre le problème de classement qui affectait certaines catégories des langues autochtones et indo-iraniennes (voir à ce sujet la section **Notes spéciales** de la publication de 1986 intitulée **Langue : Partie 1**, n° 93-102 au catalogue).

Des modifications ont aussi été apportées à la classification des langues utilisée dans les publications. En 1991, les familles des langues sino-tibétaines, des langues taï et des langues austro-asiatiques ont été ajoutées. De plus, certaines catégories résiduelles ont été rajoutées aux familles linguistiques : langues germaniques, n.i.a. (c'est-à-dire non incluses ailleurs); langues dravidiennes, n.i.a.; etc. Par ailleurs,

en raison des très faibles effectifs, certaines langues autochtones, distinguées en 1986, ont été regroupées dans la catégorie Langues athapascanes, n.i.a. en 1991. Enfin, une modification importante a été apportée à la catégorie Langues algonquines, n.i.a. Celle-ci comprend en 1991 la langue oji-cri, alors qu'elle avait été attribuée soit au cri soit à l'ojibway en 1986.

Le nombre de non-réponses à la question sur la langue parlée à la maison est demeuré stable entre les recensements de 1986 et de 1991 (315 000 personnes). Quant à la proportion de non-réponses, elle est passée de 1,3 % à 1,2 %. Exception faite du Yukon, les taux provinciaux et territoriaux ont diminué entre 1986 et 1991.

Les non-réponses et les réponses non valides ont été corrigées lors du traitement des données. Une analyse sommaire révèle que cette opération n'a pas modifié sensiblement les distributions. Toutefois, la proportion des réponses assignées est comprise entre 5 % et 9,9 % pour le frison, le danois, l'islandais, le norvégien, le kurde, le singhalais, les langues sino-tibétaines, non incluses ailleurs (n.i.a.), le khmer, les langues austro-asiatiques, n.i.a., les langues sémitiques, n.i.a., le swahili, le cri, le montagnais-naskapi, les langues algonquines, n.i.a. et les langues wakashanes; entre 10 % et 14,9 % pour le gallois, le suédois, l'ojibway, le malécite, le tsimshian et les langues amérindiennes, n.i.a.; entre 15 % et 19,9 % pour les langues gaéliques et les langues africaines, n.i.a. De plus, la proportion des réponses assignées dépasse 20 % pour quatre langues : l'esclave du Nord (peau-de-lièvre), le mohawk, les langues salishennes et l'haïda. Les analystes sont priés d'utiliser les données sur ces langues avec prudence.

Le tableau suivant présente les principales catégories de réponses aux questions sur la langue maternelle et sur la langue parlée à la maison. Les statistiques sont tirées du questionnaire complet (distribué à 20 % des ménages).

	Langue maternelle			Langue parlée à la maison		
	1981	1986	1991	1981	1986	1991
Population totale	100.0	100.0	100.0	100.0	100.0	100.0
Réponses uniques	97.8	96.6	98.8	97.8	95.4	98.2
Anglais	60.4	60.6	59.9	66.9	66.3	67.5
Français	25.2	24.3	24.1	24.2	23.2	23.0
Langues non officielles	12.2	11.6	14.8	6.6	5.9	7.7
Réponses multiples	2.2	3.4	1.2	2.2	4.6	1.8

On observe une hausse notable de la proportion de réponses uniques de 1986 à 1991, tant pour la langue maternelle que pour la langue parlée à la maison. Il s'ensuit, bien entendu, une baisse marquée du nombre et de la proportion de réponses multiples. Il est probable que ces changements soient en grande partie attribuable à l'ordre d'apparition des questions linguistiques dans le questionnaire complet. Les répondants auraient eu moins tendance à déclarer plus d'une langue aux questions sur la langue parlée le plus souvent à la maison et sur

la langue maternelle lorsqu'ils pouvaient d'abord indiquer leurs connaissances langagières.

En 1991, les statistiques sur la langue maternelle tirées du questionnaire complet présentent des différences parfois importantes par rapport aux données provenant du questionnaire abrégé. Pour de plus amples renseignements à ce sujet, veuillez consulter la section **Considérations relatives au contenu** de la publication **Langue maternelle : Données-échantillon (20 %)**, n° 93-333 au catalogue.

Les modifications à certains aspects de la collecte et du traitement des données sur la langue maternelle et sur la langue parlée à la maison rendent délicates les comparaisons dans le temps. Les utilisateurs sont donc invités à la prudence dans l'analyse des tendances.

### Calcul de la médiane

La façon d'estimer la médiane a changé de celle utilisée lors du dernier recensement et lors de la diffusion initiale des données sur le revenu du recensement de 1991 (Certaines statistiques sur le revenu, 93-331 au catalogue). La nouvelle procédure utilise un plus grand nombre de groupes et donne une estimation de la médiane beaucoup plus précise. Pour cette raison, la médiane calculée utilisant la nouvelle méthode de calcul diffère quelque peu de celle calculée avec la distribution montrée dans les publications.

### Données sur le revenu

Les revenus moyen et médian de même que l'erreur type de revenu moyen de la population de 15 ans et plus sont calculés seulement pour les personnes ayant un revenu, mais sont calculés pour toutes les familles de recensement et les ménages privés qu'ils aient ou non déclaré un revenu. Le revenu agrégé calculé à partir de ces données doit être utilisé avec prudence puisque les moyennes ont été calculées à partir d'un groupe de données non publiées.

Les répartitions des tranches du revenu total et du revenu d'emploi selon certaines caractéristiques pour la population de 15 ans et plus, les familles de recensement, les personnes hors famille, les familles économiques, les personnes seules et les ménages privés, pour le Canada, les provinces et les territoires, sont publiées dans d'autres bulletins.

Les statistiques du recensement sur le revenu sont sujettes à la variabilité d'échantillonnage. Bien qu'une telle variabilité d'échantillonnage puisse être assez petite pour de grands groupes de population, ses effets ne peuvent être ignorés dans le cas de très petits sous-groupes de population dans une région ou dans une certaine catégorie. Il en est ainsi parce que, toutes choses étant égales par ailleurs, plus petite est la taille de l'échantillon, plus grande est l'erreur. C'est pour cette raison que les données sur le revenu dans les régions où la population non institutionnelle était de moins de 250 habitants ont été supprimées. Par contre, là où les statistiques ne sont pas supprimées mais sont néanmoins fondées sur des totaux relativement petits, nous conseillons fortement aux lecteurs d'être prudents dans l'utilisation et l'interprétation de ces statistiques.

### Nombre de semaines travaillées

Les données concernant le nombre de semaines travaillées en 1990 doivent être utilisées avec circonspection pour les catégories 40 à 48 semaines et 49 à 52 semaines, car certains répondants ont tendance à exclure leurs congés payés de vacances ou pour autres raisons de leurs semaines de travail, alors que ces congés devraient être inclus. Ainsi, la catégorie 49 à 52 semaines peut être sous-estimée.

### Activité

Les concepts de l'activité au recensement n'ont pas changé entre 1986 et 1991. Par contre, le traitement des données a été modifié, ce qui a entraîné quelques différences. Au recensement de 1991, une question sur la fréquentation scolaire était posée. Cette question n'a pas été posée au recensement de 1986. Elle était utilisée pour le contrôle de la variable de l'activité, plus spécifiquement le chômage. Par conséquent, ces différences de traitement affectent la population en chômage et sont en grande partie concentrées dans le groupe d'âge des 15 à 19 ans. Le tableau ci-dessous indique l'ampleur de cet effet sur les données, au niveau du Canada.

Activité, recensement du Canada de 1991

Canada	Recensement de 1991 (chiffres publiés en 1991)	Recensement de 1991 (selon le dépouillement de 1986)
Population active de 15 ans et plus	14,474,940	14,535,850
Personnes occupées	13,005,505	13,005,500
Chômeur(euse)s	1,469,440	1,530,350
Inactifs	6,829,795	6,768,885
Population active de 15-19 ans	904,370	948,260
Personnes occupées	766,260	766,260
Chômeur(euse)s	138,110	182,005
Inactifs	967,865	923,965
Population active de 20 ans et plus	13,570,575	13,587,590
Personnes occupées	12,239,240	12,239,245
Chômeur(euse)s	1,331,330	1,348,350
Inactifs	5,861,940	5,844,925

### Indice de qualité des données pour les subdivisions de recensement, les secteurs de recensement et les secteurs de dénombremnts

En général, le recensement a été en mesure d'obtenir les chiffres exacts de la population et des logements en plus d'obtenir des taux de réponse élevés aux questions du recensement pour toutes les régions géographiques du Canada. Cependant, certaines subdivisions de recensement, en grande partie des réserves indiennes et des établissements indiens, ont accusé des taux de non-réponse très élevés pour quelques questions du recensement en dépit du fait que les chiffres de la population et des logements étaient exacts.

Un indice de qualité des données basé sur deux taux de non-réponse est fourni pour certaines subdivisions de recensement (SDR), les secteurs de recensements (SR) et les secteurs de dénombremnts (SD) afin de refléter cette situation. Le premier taux de non-réponse est un taux global égal au pourcentage de réponses requises laissées sans réponse par les répondants. Toutes les questions du recensement publiées et exclusives au questionnaire complet ont été considérées dans le calcul de ce taux global (dans le cas des questions sur le

revenu, seules les questions sur le revenu total et sur les salaires et traitements ont été considérées). L'ordre de grandeur de ce taux global est indiqué dans les totalisations de la façon suivante :

Moins de 5 % : aucune indication

5 % jusqu'à moins que 25 % : ◆

25 % ou plus : ◆◆

Les totalisations des SDR, des SR et des SD affichant un losange noir doivent être utilisées avec précaution. Les totalisations des SDR, des SR et des SD affichant deux losanges noirs (indiquant un taux global de non-réponse de 25 % ou plus) ne sont pas diffusées.

Le deuxième taux de non-réponse est calculé de la même façon que le taux global de non-réponse mais en ne considérant que les questions sur le logement exclusives au questionnaire complet. Ce taux n'est calculé que pour les totalisations qui sont diffusées. L'ordre de grandeur de ce taux de non-réponse sur le logement est indiqué dans les totalisations de la façon suivante:

Moins que 25 % : aucune indication

25 % ou plus : ◇

Les totalisations des questions sur le logement affichant un losange blanc sont diffusées mais devraient être utilisées avec extrême précaution vu les taux élevés de non-réponse pour ces questions. On constate que, dans certains cas, les losanges noirs et blancs peuvent apparaître ensemble.

Vu que le phénomène de la non-réponse élevée est très localisé, les données non diffusées au niveau des SDR, des SR et des SD sont toutefois incluses dans les totalisations à tous les niveaux géographiques plus élevés. Ces totalisations ne font pas l'objet d'un nota particulier.

## Autres produits connexes

La gamme de produits du recensement de 1991 est conçue pour satisfaire les divers besoins de nos utilisateurs. Nous offrons une grande diversité de produits et services du recensement de la population de 1991. Ils sont divisés en cinq catégories.

- (1) Les **produits de référence** sont conçus pour faciliter l'utilisation des produits et des services; ils aident les utilisateurs à reconnaître leurs besoins, à trouver et à interpréter les données.
- (2) Les **produits de données** offrent un vaste éventail de données du recensement pour les régions géographiques normalisées sur les caractéristiques sociales, culturelles et économiques des Canadiens.
- (3) Les **produits analytiques** sont des publications qui expliquent les données du recensement de 1991 sur un grand nombre de thèmes ou de sujets, dont les résultats sont présentés dans un style facile à comprendre.
- (4) Le **service des totalisations** établit des totalisations pour les utilisateurs qui veulent des données sous une forme plus détaillée ou plus précise que ce que l'on trouve dans les publications normalisées.
- (5) On offre des **ateliers et des séminaires** aux nouveaux utilisateurs et aux utilisateurs actuels pour les informer sur les données du recensement et pour les aider à en tirer le maximum en fonction de leurs besoins.

Pour de plus amples renseignements sur les produits et services du recensement offerts, consultez le **Catalogue du recensement de 1991**, n° 92-302F au catalogue. Vous pouvez également contacter le centre régional de consultation le plus près indiqué à la section «Pour renseignements» de la présente publication.

Vous trouverez ci-après une liste d'autres produits ayant une présentation et un contenu semblables à cette publication.

## Publication équivalente pour les recensements antérieurs

## Centres régionaux de consultation

Les centres régionaux de consultation de Statistique Canada offrent une gamme complète des produits et services du recensement. On y trouve une bibliothèque et un comptoir de vente où les utilisateurs peuvent consulter ou acheter les différents produits, dont les publications, les disquettes de micro-ordinateurs, les microfiches et les cartes.

Le personnel des centres régionaux de consultation fournit des services de consultation et de recherche en plus du service après-vente, y compris des séminaires et des ateliers sur l'utilisation des données de Statistique Canada.

Chaque centre vous offre la possibilité d'extraire de l'information des systèmes d'extraction des données informatisés CANSIM et E-STAT de Statistique Canada. Un service de renseignements téléphonique est également disponible; ce service est gratuit pour les utilisateurs se trouvant à l'extérieur des secteurs d'appels locaux. Téléphonez, écrivez, télécopiez ou visitez le centre régional de consultation le plus près pour de plus amples renseignements.

## Autres références et services

Vous pouvez vous procurer les publications de Statistique Canada dans les centres régionaux de consultation et dans les bibliothèques de dépôt, ou vous pouvez également les commander par l'entremise de votre **librairie** ou de votre **agent d'abonnement**. Pour obtenir une liste des points de vente au Canada, communiquez avec le centre régional de consultation le plus près, ou consultez le Catalogue du recensement de 1991 (n° 92-302F au catalogue).

Les distributeurs secondaires présentent à leurs clients des possibilités d'accès aux données et un soutien aux analyses grâce à une diversité de services de consultation et de services informatisés que n'offre pas Statistique Canada. Vous pouvez obtenir les noms et adresses des distributeurs autorisés dans un centre régional de consultation.

Statistique Canada offre des **produits géographiques numériques** qui permettent la manipulation informatique des données géographiques. Un service d'extraction des données personnalisé permet aux utilisateurs de délimiter eux-mêmes, s'ils le désirent, la région géographique qu'ils veulent étudier. La gamme de fichiers d'extraction des données et de services offre une grande flexibilité dans la sélection d'une base géographique.

Vous trouverez dans le Catalogue du recensement de 1991 (n° 92-302F au catalogue) la description complète des fichiers numériques et des services.

On peut obtenir des renseignements sur les **produits et services du recensement de l'agriculture** en consultant la publication Produits et services du recensement de l'agriculture de 1991, n° 92-303 au catalogue, ou en téléphonant sans frais au 1-800-465-1991.

Les utilisateurs qui ont besoin de données spéciales peuvent demander les **services des enquêtes postcensitaires**. Les données sont présentées sur disquettes pour micro-ordinateur pouvant être utilisées avec un programme de calcul de tableaux financiers ou sur support papier. Pour de plus amples renseignements, communiquez avec le centre régional de consultation le plus près.

Le système CANSIM de Statistique Canada, qui consiste en un réseau de bases de données informatisées et un service d'extraction des données, permet aux utilisateurs d'accéder aux statistiques actuelles et historiques de diverses façons, notamment grâce aux progiciels spécialisés de manipulation et d'analyse des données, aux ressources graphiques et au service de recherche bibliographique. Pour de plus amples renseignements sur le CANSIM, communiquez avec la Division de la commercialisation ou un centre régional de consultation.

## Notes, Footnotes and Abbreviations

### Note(s)

Comparison of the 1991 Census data with data from earlier censuses is affected by a change in the definition of the 1991 Census population. Persons in Canada on student authorizations, employment authorizations, Minister's permits, and as refugee claimants were enumerated in the 1991 Census but not in previous censuses. These persons are referred to as non-permanent residents. For further information, see the "Special Notes" section.

.. Figures not available.

... Figures not appropriate or not applicable.

- Nil or zero.

-- Amount too small to be expressed.

† Excludes Census data for one or more incompletely enumerated Indian reserves or Indian settlements. For further information, see the "Special Notes" section.

¶ Incompletely enumerated Indian reserve or Indian settlement. For further information, see the "Special Notes" section.

### Footnote(s)

(1) With the exception of line 1, all characteristics exclude institutional residents and are based on weighted sample data (20%). In some instances, due to weighting factors, it is possible for small areas to have an "estimated population excluding institutional residents" (line 2) higher than the "population including institutional residents" (line 1). For more detailed information, refer to "Count Discrepancies Between 100% Data and 20% Sample Data" and "Sampling and Weighting" sections of the text.

(2) Indicates the number of respondents reporting knowledge of these non-official languages.

(3) "Other religions" includes Eastern Orthodox, Jewish, Eastern non-Christian, para-religious groups, and other, n.e.c.

(4) Includes the single responses of English, Irish, Scottish, Welsh and Other British, n.i.e.

(5) Includes the single responses of French, Acadian and Québécois.

## Nota, Renvois et Abréviations

### Nota

La comparaison des données du recensement de 1991 avec celles des recensements précédents est affectée par la modification apportée à la définition de la population du recensement de 1991. Les titulaires d'un permis de séjour pour étudiants, d'un permis de travail, d'un permis ministériel et les revendicateurs du statut de réfugié ont été dénombrés au recensement de 1991, mais ne l'ont pas été aux recensements antérieurs. Ces personnes sont des résidents non permanents. Pour plus de renseignements, voir la section «Notes spéciales».

.. Nombres non disponibles.

... N'ayant pas lieu de figurer.

- Néant ou zéro.

-- Nombres infimes.

† Ne comprend pas les données du recensement pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés. Pour plus de renseignements, voir la section «Notes spéciales».

¶ Réserve indienne ou établissement indien partiellement dénombré. Pour plus de renseignements, voir la section «Notes spéciales».

### Renvoi(s)

(1) Sauf à la ligne 1, toutes les caractéristiques excluent les pensionnaires d'un établissement institutionnel et sont fondées sur les données-échantillon pondérées (20 %). Dans certains cas, en raison des coefficients de pondération, il est possible que, dans les petites régions, «l'estimation de la population ne comprenant pas les pensionnaires d'un établissement institutionnel» (ligne 2) soit plus élevée que «la population comprenant les pensionnaires d'un établissement institutionnel» (ligne 1). Pour de plus amples renseignements, voir les sections du texte intitulées «Divergences de chiffres entre les données intégrales et les données-échantillon (20 %)» et «Échantillonnage et pondération».

(2) Indique le nombre de répondants qui ont dit avoir une connaissance de ces langues non officielles.

(3) «Autres religions» comprend orthodoxe orientale, juive, les religions non chrétiennes orientales, groupes parareligieux, et autre, n.c.a.

(4) Comprend les réponses uniques suivantes : Anglais, Irlandais, Écossais, Gallois et autres Britanniques, n.i.e.

(5) Comprend les réponses uniques suivantes : Français, Acadien et Québécois.

- |   |   |
|---|---|
| <p>(6) Includes the single responses of Inuit, Métis and North American Indian.</p> <p>(7) "Black" includes the single origins of Black, Ghanaian and African Black, n.i.e.</p> <p>(8) A multiple response occurs when a respondent provides two or more ethnic origins.</p> <p>(9) Includes Canadian citizenship by birth and Canadian citizenship by naturalization.</p> <p>(10) Includes persons born outside the province of residence as well as persons born outside Canada who have Canadian citizenship by birth and, therefore, will not have immigrated to Canada.</p> <p>(11) Excludes the United Kingdom.</p> <p>(12) "Other Asia" includes the Middle East and excludes India.</p> <p>(13) "Other" includes persons born in Canada who do not have Canadian citizenship by birth, but who do have a valid year of immigration.</p> <p>(14) Refers to persons who hold a student authorization, employment authorization or Minister's permit, or who are refugee claimants.</p> <p>(15) Includes the first five months only of 1991.</p> <p>(16) Population residing in Canada, excluding all persons in collective households and Canadians (military and government personnel) in households outside Canada.</p> <p>(17) Includes "Never attended school or attended kindergarten only".</p> <p>(18) Refers to courses completed at postsecondary non-university institutions which normally require a secondary school graduation certificate or equivalent for entrance, AS WELL AS to other courses in related or like institutions (such as private trade schools or adult vocational centres) which may NOT require secondary school graduation for entrance.</p> <p>(19) Includes "Other non-university certificate or diploma" and "Trades certificate or diploma".</p> <p>(20) This participation rate is calculated for females 15 years and over in private households only.</p> <p>(21) Refers to females 15 years and over in private households with children under 6 years of age as well as children 6 years and over.</p> <p>(22) The "Not applicable" category refers to unemployed persons 15 years and over who have never worked or who had worked only prior to January 1, 1990. For these persons, the industry, occupation and class of worker questions did not apply (this category is also referred to as the "Inexperienced labour force").</p> | <p>(6) Comprend les réponses uniques suivantes : Inuit, Métis et Indien de l'Amérique du Nord.</p> <p>(7) «Noir» comprend les réponses uniques Noir, Ghanéen et Noir africain, n.i.a.</p> <p>(8) Quand un répondant indique plus d'une origine ethnique, il donne une réponse multiple.</p> <p>(9) Comprend les citoyens canadiens de naissance et les citoyens canadiens par naturalisation.</p> <p>(10) Comprend les personnes nées en dehors de la province de résidence ainsi que les personnes nées en dehors du Canada qui sont citoyens canadiens de naissance et qui, par conséquent, n'ont pas à immigrer au Canada.</p> <p>(11) Ne comprend pas le Royaume-Uni.</p> <p>(12) «Autre Asie» comprend le Moyen-Orient mais ne comprend pas l'Inde.</p> <p>(13) «Autre» comprend les personnes nées au Canada qui ne sont pas citoyens canadiens de naissance, mais pour qui l'année d'immigration est valide.</p> <p>(14) Personnes qui sont titulaires d'un permis de séjour pour étudiants, d'un permis de travail ou d'un permis ministériel, ou qui revendiquent le statut de réfugié.</p> <p>(15) Ne comprend que les cinq premiers mois de 1991.</p> <p>(16) Personnes résidant au Canada, à l'exclusion de toutes les personnes dans les logements collectifs et des Canadiens (militaires et fonctionnaires) qui font partie d'un ménage à l'extérieur du Canada.</p> <p>(17) Comprend «Aucune scolarité ou uniquement l'école maternelle».</p> <p>(18) Désigne les cours terminés dans un établissement postsecondaire non universitaire qui exige habituellement comme condition d'admission un certificat d'études secondaires ou l'équivalent; il peut AUSSI s'agir d'autres cours dans des établissements similaires (par exemple, des écoles de métiers privées ou des centres de formation professionnelle) qui ne demandent PAS nécessairement comme condition d'admission un certificat d'études secondaires.</p> <p>(19) Comprend «Certificat ou diplôme d'autres études non universitaires» et «Certificat ou diplôme d'une école de métiers».</p> <p>(20) Ce taux d'activité est calculé pour les femmes de 15 ans et plus dans les ménages privés seulement.</p> <p>(21) Se réfère aux femmes de 15 ans et plus dans les ménages privés ayant des enfants de moins de 6 ans ainsi que des enfants de 6 ans et plus.</p> <p>(22) La catégorie «Sans objet» se rapporte aux personnes en chômage de 15 ans et plus qui n'ont jamais travaillé ou qui ont travaillé seulement avant le 1<sup>er</sup> janvier 1990. Pour ces personnes, les questions sur l'industrie, la profession et la catégorie de travailleurs ne s'appliquaient pas (on nomme aussi cette catégorie «Population active inexpérimentée»).</p> |
|---|---|

- (23) Occupation major group and industry division totals include computer assignment of the "Not stated" categories. These assignments are based on selected socio-economic characteristics.
- (24) This category is also referred to as the "Experienced labour force".
- (25) Includes the following industry divisions: agricultural and related service industries; fishing and trapping industries; logging and forestry industries; mining (including milling), quarrying and oil well industries.
- (26) Includes the following industry divisions: wholesale trade industries; retail trade industries.
- (27) Includes the following industry divisions: finance and insurance industries; real estate operator and insurance agent industries.
- (28) Includes the following industry divisions: business service industries; accommodation, food and beverage service industries; other service industries.
- (29) Includes the following occupation major groups: occupations in natural sciences, engineering and mathematics; occupations in social sciences and related fields; occupations in religion; artistic, literary, recreational and related occupations.
- (30) Includes the following occupation major groups: farming, horticultural and animal husbandry occupations; fishing, trapping and related occupations; forestry and logging occupations; mining and quarrying, including oil and gas field occupations.
- (31) Includes the following occupation major groups: machining and related occupations; product fabricating, assembling and repairing occupations.
- (32) Includes the following occupation major groups: material handling and related occupations, n.e.c.; other crafts and equipment operating occupations; occupations not elsewhere classified.
- (33) Includes unpaid family workers.
- (34) The two categories "Employees" and "Self-employed (incorporated)" can be combined to form the larger category "Paid workers".
- (35) Applies to owner-occupied non-farm, non-reserve dwellings only.
- (36) Includes the first five months only of 1991.
- (37) Applies to tenant-occupied non-farm, non-reserve dwellings only.
- (23) Les totaux des grands groupes de professions et des divisions d'industrie comprennent les attributions par ordinateur des catégories «non déclarées». Ces attributions sont fondées sur certaines caractéristiques socio-économiques.
- (24) On nomme aussi cette catégorie «Population active expérimentée».
- (25) Comprend les divisions d'industrie suivantes : industries agricoles et de services connexes; industries de la pêche et du piégeage; industries de l'exploitation forestière et des services forestiers; industries des mines (y compris broyage), carrières et puits de pétrole.
- (26) Comprend les divisions d'industrie suivantes : industries du commerce de gros; industries du commerce de détail.
- (27) Comprend les divisions d'industrie suivantes : industries des intermédiaires financiers et des assurances; industries des services immobiliers et agences d'assurances.
- (28) Comprend les divisions d'industrie suivantes : industries des services aux entreprises; industries de l'hébergement et de la restauration; autres industries de services.
- (29) Comprend les grands groupes de professions suivants : travailleurs des sciences naturelles, du génie et des mathématiques; travailleurs spécialisés des sciences sociales et domaines connexes; membres du clergé et assimilés; professionnels des domaines artistique et littéraire et personnel assimilé.
- (30) Comprend les grands groupes de professions suivants : agriculteurs, horticulteurs et éleveurs; pêcheurs, trappeurs et travailleurs assimilés; travailleurs forestiers et bûcherons; mineurs, carriers, foreurs de puits de pétrole et de gaz et travailleurs assimilés.
- (31) Comprend les grands groupes de professions suivants : usineurs et travailleurs des domaines connexes; travailleurs spécialisés dans la fabrication, le montage et la réparation de produits.
- (32) Comprend les grands groupes de professions suivants : manutentionnaires et travailleurs assimilés, n.c.a.; autres ouvriers qualifiés et conducteurs de machines; travailleurs non classés ailleurs.
- (33) Comprend les travailleurs familiaux non rémunérés.
- (34) Les deux catégories «Employé(e)s» et «Travailleur(euse)s autonomes (constitué(e)s en société)» peuvent être combinées pour former la catégorie «Travailleur(euse)s rémunéré(e)s».
- (35) Ne s'applique qu'aux logements non agricoles hors réserve occupés par leur propriétaire.
- (36) Ne comprend que les cinq premiers mois de 1991.
- (37) Ne s'applique qu'aux logements non agricoles hors réserve occupés par un locataire.

- (38) Includes households in tenant-occupied non-farm, non-reserve dwellings with household income greater than \$0 in 1990 (i.e. excludes negative or zero household income).
- (39) Includes households in owner-occupied non-farm, non-reserve dwellings with household income greater than \$0 in 1990 (i.e. excludes negative or zero household income).
- (40) Worked 49-52 weeks in 1990, mostly full time.
- (41) Worked 49-52 weeks in 1990, mostly part time, or worked less than 49 weeks.
- (42) Percentages may not add to 100% due to rounding.
- (43) Includes loss.
- (44) For persons with income.
- (45) See text for universe covered and for definitions of concepts and terms.
- (46) Calculations based on unrounded data.

#### **Abbreviation(s)**

n.e.c. = not elsewhere classified.

n.i.e. = not included elsewhere.

- (38) Comprend les ménages dans les logements non agricoles hors réserve occupés par un locataire dont le revenu du ménage est plus de 0 \$ en 1990 (c'est-à-dire ne comprend pas les ménages ayant un revenu négatif ou n'ayant aucun revenu).
- (39) Comprend les ménages dans les logements non agricoles hors réserve occupés par leur propriétaire dont le revenu du ménage est plus de 0 \$ en 1990 (c'est-à-dire ne comprend pas les ménages ayant un revenu négatif ou n'ayant aucun revenu).
- (40) Ayant travaillé 49-52 semaines en 1990, surtout à plein temps.
- (41) Ayant travaillé 49-52 semaines en 1990, surtout à temps partiel, ou ayant travaillé moins de 49 semaines.
- (42) Les pourcentages ayant été arrondis, la somme peut ne pas être 100 %.
- (43) Comprend les pertes.
- (44) S'applique aux personnes ayant un revenu.
- (45) Se reporter au texte pour connaître l'univers pris en compte et les définitions des concepts et des termes.
- (46) Les calculs sont basés sur des données non arrondies.

#### **Abréviation(s)**

n.c.a. = non classés ailleurs.

n.i.a. = non incluses ailleurs.
